Bond stress
Nonlinear Analysis of Reinforced Concrete Beam–Columns with Bond-Slip — Ashraf Ayoub; 132 (11), 1177-86 (2006).

Bonding
Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).

Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).

Boreholes
Porochemoelastic Solution for an Inclined Borehole in a Transversely Isotropic Formation — Shailesh Ekbote and Younane Abousleiman; 132 (7), 754-63 (2006).

Boundaries
Upsetting Tests of Fresh Cementitious Composites for Extrusion — Xiangming Zhou and Zongjin Li; 132 (2), 149-57 (2006).

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Vibration of Open Cylindrical Shells with Stepped Thickness Variations — L. Zhang and Y. Xiang; 132 (7), 780-4 (2006).

Boundary element method
Three-Dimensional Indirect Boundary Element Method Formulation for Dynamic Analysis of Frames Buried in Semiinfinite Elastic Media — Federico Pinto and Carlos A. Prato; 132 (9), 967-78 (2006).

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Boundary layer flow
Turbulent Boundary Layer Flows Above a Porous Surface Subject to Flow Injection — Pengzhi Lin and S. A. S. A. Karunarathna; 132 (10), 1133-40 (2006).

Boussinesq equations
Fully Nonlinear Boussinesq-Type Equations for Waves and Currents over Porous Beds — Qin Chen; 132 (2), 220-30 (2006).

Breakwaters
Wave Interaction with a Flexible Porous Breakwater in a Two-Layer Fluid — P. Suresh Kumar and T. Sahoo; 132 (9), 1007-14 (2006).

Bridge, highway
Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).

Bridges
Auto-Parametric Vibration of a Cable-Stayed-Beam Structure under Random Excitation — Yong Xia and Yozo Fujino; 132 (3), 279-86 (2006).

Revisiting Multimode Coupled Bridge Flutter: Some New Insights — Xinzhong Chen and Ahsan Kareem; 132 (10), 1115-23 (2006).

Bridges, cable-stayed
Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).

Bridges, highway
Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).

Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).

Bridges, suspension
Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Buckling
Buckling of Simply Supported Rectangular Reissner–Mindlin Plates Subjected to Linearly Varying In-Plane Loading — Hongzhi Zhong and Chao Gu; 132 (5), 578-81 (2006).

Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and Atle Gjelsvik; 132 (6), 594-9 (2006).

The Most Degrading Postbuckling Mode of Pin-Jointed Structures — M. D. Davister; 132 (7), 775-9 (2006).

Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).

Buckling of Multiwalled Carbon Nanotubes Using Timoshenko Beam Theory — Y. Y. Zhang, C. M. Wang, and V. B. C. Tan; 132 (9), 952-8 (2006).

Shear-Flexural Buckling of Cantilever Columns under Uniformly Distributed Load — M. C. M. Bakker; 132 (11), 1160-7 (2006).

Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).

Buried structures
Three-Dimensional Indirect Boundary Element Method Formulation for Dynamic Analysis of Frames Buried in Semiinfinite Elastic Media — Federico Pinto and Carlos A. Prato; 132 (9), 967-78 (2006).

Cable-stayed
Auto-Parametric Vibration of a Cable-Stayed-Beam Structure under Random Excitation — Yong Xia and Yozo Fujino; 132 (3), 279-86 (2006).

Cables
Nonlinear Analytical Solution for Cable Truss — Stanislav Kmet and Zuzana Kokorudova; 132 (1), 119-23 (2006).

Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer, and Erik A. Johnson; 132 (3), 268-78 (2006).

Dynamic Behavior of Nonlinear Cable System. IV — H. Dai and D. A. Gasparini; 132 (3), 287-94 (2006).

Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Symmetric Catenary of a Uniform Elastic Cable of Neo-Hookean Material — A. Valiente; 132 (7), 747-53 (2006).

Carbon
Buckling of Multiwalled Carbon Nanotubes Using Timoshenko Beam Theory — Y. Y. Zhang, C. M. Wang, and V. B. C. Tan; 132 (9), 952-8 (2006).

Cementation
Upsetting Tests of Fresh Cementitious Composites for Extrusion — Xiangming Zhou and Zongjin Li; 132 (2), 149-57 (2006).

Channel flow
Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Chemical properties
Porochemoelastic Solution for an Inclined Borehole in a Transversely Isotropic Formation — Shailesh Ekbote and Younane Abousleiman; 132 (7), 754-63 (2006).

Clays
Behavior of One-Dimensional Consolidation under Time-Dependent Loading — Tung-Wen Hsu and Shuan-Chai Lu; 132 (4), 457-62 (2006).

Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Closed form solutions
Postbuckling of Beam Subjected to Intermediate Follower Force — B. Phungpaingam, S. Chucheepsakul, and C. M. Wang; 132 (1), 16-25 (2006).

Nonlinear Analytical Solution for Cable Truss — Stanislav Kmet and Zuzana Kokorudova; 132 (1), 119-23 (2006).

Exact Solution of Out-of-Plane Problems of an Arch with Varying Curvature and Cross Section — E. Tufekci and O. Y. Dogruer; 132 (6), 600-9 (2006).

Closed-Form Stiffness Matrix for the Four-Node Quadrilateral Element with a Fully Populated Material Stiffness — C. E. Zhou and F. J. Vecchio; 132 (12), 1392-5 (2006).

Coating
Effective Moduli of Coated Particulate Composites with BCC Structure at High Concentration — Hossein M. Shodja and Farshid Roumi; 132 (8), 882-8 (2006).

Coefficients
Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

Galerkin Solution for Linear Stochastic Algebraic Equations — Mircea Grigoriu; 132 (12), 1277-89 (2006).

Collapse
Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and

Atle Gjelsvik; 132 (6), 594-9 (2006).

The Most Degrading Postbuckling Mode of Pin-Jointed Structures — M. D. Davister; 132 (7), 775-9 (2006).

Lagrangian Approach to Structural Collapse Simulation — Mettupalayam V. Sivaselvan and Andrei M. Reinhorn; 132 (8), 795-805 (2006).

Columns

Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and Atle Gjelsvik; 132 (6), 594-9 (2006).

Postbuckling of Elastic Columns with Second-Mode Imperfection — Raymond H. Plaut, David A. Dillard, and Lawrence N. Virgin; 132 (8), 898-901 (2006).

Shear-Flexural Buckling of Cantilever Columns under Uniformly Distributed Load — M. C. M. Bakker; 132 (11), 1160-7 (2006).

Comparative studies

On the Comparison of Timoshenko and Shear Models in Beam Dynamics — Noël Challamel; 132 (10), 1141-5 (2006).

Composite materials

Upsetting Tests of Fresh Cementitious Composites for Extrusion — Xiangming Zhou and Zongjin Li; 132 (2), 149-57 (2006).

Effective Medium Theories for Multicomponent Poroelastic Composites — James G. Berryman; 132 (5), 519-31 (2006).

Internal Forces for Statically Indeterminate Structures Having Different Moduli in Tension and Compression — Wenjuan Yao and Zhiming Ye; 132 (7), 739-46 (2006).

Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

System Identification of Partially Restrained Composite Plates Using Measured Natural Frequencies — C. R. Lee and T. Y. Kam; 132 (8), 841-50 (2006).

Effective Moduli of Coated Particulate Composites with BCC Structure at High Concentration — Hossein M. Shodja and Farshid Roumi; 132 (8), 882-8 (2006).

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).

Damage Theory Based on Composite Mechanics — Yunping Xi, Morteza Eskandari-Ghadi, Suwito, and Stein Sture; 132 (11), 1195-204 (2006).

A Stochastic Transformation Field Theory for Heterogeneous Materials — Todd O. Williams; 132 (11), 1224-40 (2006).

Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).

Multiscale Nonlinear Framework for the Long-Term Behavior of Layered Composite Structures — Rami Haj-Ali and Anastasia H. Muliana; 132 (12), 1354-62 (2006).

Composite structures

Multiscale Nonlinear Framework for the Long-Term Behavior of Layered Composite Structures — Rami Haj-Ali and Anastasia H. Muliana; 132 (12), 1354-62 (2006).

Compressibility

Compressibility Moduli for Porous Materials Incorporating Volume Fraction — Lynn S. Bennethum; 132 (11), 1205-14 (2006).

Compression

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Internal Forces for Statically Indeterminate Structures Having Different Moduli in Tension and Compression — Wenjuan Yao and Zhiming Ye; 132 (7), 739-46 (2006).

Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).

Computation

Computation of Mixed-Mode Stress Intensity Factors for Cracks in Three-Dimensional Functionally Graded Solids — Matthew C. Walters, Glaucio H. Paulino, and Robert H. Dodds; 132 (1), 1-15 (2006).

Concrete

Determining the Tensile Stress-Crack Opening Curve of Concrete by Inverse Analysis — José Luiz Antunes de Oliveira e Sousa and Ravindra Gettu; 132 (2), 141-8 (2006).

Toward a Physical Damage Variable for Concrete — Eric N. Landis; 132 (7), 771-4 (2006).

Analyses of Heated Concrete Spalling due to Restrained Thermal Dilation: Application to the "Chunnel" Fire — Y. Msaad and G. Bonnet; 132 (10), 1124-32 (2006).

Size Effect on Strength of Quasibrittle Structures with Reentrant Corners Symmetrically Loaded in Tension — Zdeněk P. Bažant and Qiang Yu; 132 (11), 1168-76 (2006).

Damage Theory Based on Composite Mechanics — Yunping Xi, Morteza Eskandari-Ghadi, Suwito, and Stein Sture; 132 (11), 1195-204 (2006).

Concrete beams

Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Concrete columns

Nonlinear Analysis of Reinforced Concrete Beam–Columns with Bond-Slip — Ashraf Ayoub; 132 (11), 1177-86 (2006).

Concrete structures

Nondestructive Assessment of Reinforced Concrete Structures Based on Fractal Damage Characteristic Factors — Maosen Cao, Qingwen Ren, and Pizhong Qiao; 132 (9), 924-31 (2006).

Concrete, post-tensioned

Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Concrete, prestressed

Theoretical Analysis of Transfer Lengths in Pretensioned Prestressed Concrete Members — Byung Hwan Oh, Eui Sung Kim, and Young Cheol Choi; 132 (10), 1057-66 (2006).

Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Concrete, reinforced

Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).

Nondestructive Assessment of Reinforced Concrete Structures Based on Fractal Damage Characteristic Factors — Maosen Cao, Qingwen Ren, and Pizhong Qiao; 132 (9), 924-31 (2006).

Closed-Form Stiffness Matrix for the Four-Node Quadrilateral Element with a Fully Populated Material Stiffness — C. E. Zhou and F. J. Vecchio; 132 (12), 1392-5 (2006).

Constitutive models

New Stabilized Finite Element Method Embedded with a Cap Model for the Analysis of Granular Materials — Kaiming Xia and Arif Masud; 132 (3), 250-9 (2006).

Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).

A Stochastic Transformation Field Theory for Heterogeneous Materials — Todd O. Williams; 132 (11), 1224-40 (2006).

Constitutive relations

Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).

Constraints

Optimal Design with Probabilistic Objective and Constraints — Johannes O. Royset, Armen Der Kiureghian, and Elijah Polak; 132 (1), 107-18 (2006).

Contact pressure

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Contacts

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Control systems

Optimal H_∞ Output Feedback Control Systems with Time Delay — Chi-Chang Lin, Chang-Ching Chang, and Huang-Lin Chen; 132 (10), 1096-105 (2006).

Conveyors
Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Correlation
Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Corrosion
Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Corrugating
Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Coupling
Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Cracking
Computation of Mixed-Mode Stress Intensity Factors for Cracks in Three-Dimensional Functionally Graded Solids — Matthew C. Walters, Glaucio H. Paulino, and Robert H. Dodds; 132 (1), 1-15 (2006).

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Determining the Tensile Stress-Crack Opening Curve of Concrete by Inverse Analysis — José Luiz Antunes de Oliveira e Sousa and Ravindra Gettu; 132 (2), 141-8 (2006).

Fracture Analysis of Shear Deformable Bi-Material Interface — Jialai Wang and Pizhong Qiao; 132 (3), 306-16 (2006).

Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).

Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).

Simulation of Crack Propagation in Asphalt Concrete Using an Intrinsic Cohesive Zone Model — Seong Hyeok Song, Glaucio H. Paulino, and William G. Buttlar; 132 (11), 1215-23 (2006).

Creep
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

Critical loads
Axisymmetric Nonlinear Stability of a Shallow Conical Shell with a Spherical Cap of Arbitrary Variable Shell Thickness — Chao-Sheng Hou, Yue Yin, and Cheng-Bo Wang; 132 (10), 1146-9 (2006).

Cross sections
Exact Solution of Out-of-Plane Problems of an Arch with Varying Curvature and Cross Section — E. Tufekci and O. Y. Dogruer; 132 (6), 600-9 (2006).

Currents
Fully Nonlinear Boussinesq-Type Equations for Waves and Currents over Porous Beds — Qin Chen; 132 (2), 220-30 (2006).

Spatial and Temporal Characteristics of Transient Extreme Wave Profiles on Depth-Varying Currents — Aifeng Yao and Chin H. Wu; 132 (9), 1015-25 (2006).

Curvature
Symmetric Catenary of a Uniform Elastic Cable of Neo-Hookean Material — A. Valiente; 132 (7), 747-53 (2006).

Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).

Curved beams
Exact Solution of Out-of-Plane Problems of an Arch with Varying Curvature and Cross Section — E. Tufekci and O. Y. Dogruer; 132 (6), 600-9 (2006).

Cyclic loads
Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

Fracture Mechanics Based Model for Joints under Cyclic Loading — Eric Puntel, Gabriella Bolzon, and Victor E. Saouma; 132 (11), 1151-9 (2006).

Cylinders
Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Cylindrical shells
Thermomechanical Postbuckling Analysis of Cross-Piy Laminated Cylindrical Shell Panels — J. Girish and L. S. Ramachandra; 132 (2), 133-40 (2006).

Vibration of Open Cylindrical Shells with Stepped Thickness Variations — L. Zhang and Y. Xiang; 132 (7), 780-4 (2006).

Nonlinear Response of Laminated Cylindrical Shell Panels Subjected to Thermomechanical Loads — Maloy K. Singha, L. S. Ramachandra, and J. N. Bandyopadhyay; 132 (10), 1088-95 (2006).

Damage
Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97 (2006).

Flexibility-Based Damage Localization from Stochastic Realization Results — Dionisio Bernal; 132 (6), 651-8 (2006).

Toward a Physical Damage Variable for Concrete — Eric N. Landis; 132 (7), 771-4 (2006).

Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).

Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).

Damage assessment
Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).

Cross-Modal Strain Energy Method for Estimating Damage Severity — Sau-Lon James Hu, Shuqing Wang, and Huajun Li; 132 (4), 429-37 (2006).

Damages
Nondestructive Assessment of Reinforced Concrete Structures Based on Fractal Damage Characteristic Factors — Maosen Cao, Qingwen Ren, and Pizhong Qiao; 132 (9), 924-31 (2006).

Damping
Optimal Vibration Absorber with Nonlinear Viscous Power Law Damping and White Noise Excitation — F. Rüdinger; 132 (1), 46-53 (2006).

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).

Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer, and Erik A. Johnson; 132 (3), 268-78 (2006).

Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).

Dynamic Stability of Ferromagnetic Beam-Plates with Magnetoelastic Interaction and Magnetic Damping in Transverse Magnetic Fields — Xingzhe Wang and Jong Seh Lee; 132 (4), 422-8 (2006).

Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Modified Sturm Sequence Property for Damped Systems — Ji-Seong Jo, Man-Gi Ko, Sang-Won Cho, and In-Won Lee; 132 (7), 785-9 (2006).

Damping in Shear Beam Structures and Estimation of Drift Response — M. Sasani, N. Makris, and B. A. Bolt; 132 (8), 851-8 (2006).

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

Optimal Nonlocal and Asymmetric Structural Damping Using Regenerative Force Actuation Networks — J. T. Scruggs and W. D. Iwan; 132 (9), 932-40 (2006).

Dams

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Dams, arch

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Decomposition

Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).

Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

Deep water

Probability of Fatigue Failure in Steel Catenary Risers in Deep Water — Tapan K. Sen; 132 (9), 1001-6 (2006).

Deflection

Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and Atle Gjelsvik; 132 (6), 594-9 (2006).

Deformation

Identification and Modeling of Permanent Deformations of Asphalt Concrete — Saurabh Bahuguna, Vassilis P. Panoskaltsis, and Katerina D. Papoulia; 132 (3), 231-9 (2006).

Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).

Delay time

Time-Delayed Positive Velocity Feedback Control Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Optimal H_∞ Output Feedback Control Systems with Time Delay — Chi-Chang Lin, Chang-Ching Chang, and Huang-Lin Chen; 132 (10), 1096-105 (2006).

Design

Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and Atle Gjelsvik; 132 (6), 594-9 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. II: Applications — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1301-12 (2006).

Deterioration

Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Diffusion

Porochemoelastic Solution for an Inclined Borehole in a Transversely Isotropic Formation — Shailesh Ekbote and Younane Abousleiman; 132 (7), 754-63 (2006).

Digital techniques

Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).

Dikes

Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).

Dilatancy

Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Discontinuities

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Discrete elements

Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).

Input Parameters of Discrete Element Methods — Tang-Tat Ng; 132 (7), 723-9 (2006).

Dispersion

Analytical Study of Turbulent Pollutant Dispersion near a Low Hill — Andy T. Chan, Natalia T. N. Lai, and Pradeep G. Siddheshwar; 132 (1), 99-106 (2006).

Displacement

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).

Antiplane (SH) Waves Diffraction by a Semicircular Cylindrical Hill Revisited: An Improved Analytic Wave Series Solution — Vincent W. Lee, Hao Luo, and Jianwen Liang; 132 (10), 1106-14 (2006).

Drift

Damping in Shear Beam Structures and Estimation of Drift Response — M. Sasani, N. Makris, and B. A. Bolt; 132 (8), 851-8 (2006).

Dynamic analysis

Accurate Representation of External Force in Time History Analysis — Shuenn-Yih Chang; 132 (1), 34-45 (2006).

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Three-Dimensional Indirect Boundary Element Method Formulation for Dynamic Analysis of Frames Buried in Semiinfinite Elastic Media — Federico Pinto and Carlos A. Prato; 132 (9), 967-78 (2006).

Dynamic characteristics

Dynamic Behavior of Nonlinear Cable System. IV — H. Dai and D. A. Gasparini; 132 (3), 287-94 (2006).

Dynamic loads

Accurate Representation of External Force in Time History Analysis — Shuenn-Yih Chang; 132 (1), 34-45 (2006).

Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

Short-Term Structural Instability under Random Dynamic Loads — M. Dimentberg, D. Iourtchenko, and A. Naess; 132 (11), 1269-72 (2006).

Dynamic models

On the Comparison of Timoshenko and Shear Models in Beam Dynamics — Noël Challamel; 132 (10), 1141-5 (2006).

Dynamic response

Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Modified Sturm Sequence Property for Damped Systems — Ji-Seong Jo, Man-Gi Ko, Sang-Won Cho, and In-Won Lee; 132 (7), 785-9 (2006).

Dynamic Response of Closed-Loop System with Uncertain Parameters Using Interval Finite-Element Method — Su Huan Chen and Xiao Ming Zhang; 132 (8), 830-40 (2006).

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).

Force Identification Based on Sensitivity in Time Domain — Z. R. Lu and S. S. Law; 132 (10), 1050-6 (2006).

Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. II: Applications — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1301-12 (2006).

Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).

Dynamic stability

Numerical Simulations of Dynamic Instability of

Elastic-Plastic Beams — Guowei Ma, Yumin Liu, and Qingming Li; 132 (3), 260-7 (2006).

Dynamics

Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).

Revisiting Multimode Coupled Bridge Flutter: Some New Insights — Xinzhong Chen and Ahsan Kareem; 132 (10), 1115-23 (2006).

Earthquake engineering

Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

Time-Delayed Positive Velocity Feedback Control Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Optimal H_∞ Output Feedback Control Systems with Time Delay — Chi-Chang Lin, Chang-Ching Chang, and Huang-Lin Chen; 132 (10), 1096-105 (2006).

Earthquake loads

Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).

Earthquakes

Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).

Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).

Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).

Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).

Eccentricity

Influence of Hopper Eccentricity on Discharge of Cylindrical Mass Flow Silos with Rigid Walls — P. Vidal, A. Couto, F. Ayuga, and M. Guaita; 132 (9), 1026-33 (2006).

Effective stress

Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).

Eigenvalues

Modified Sturm Sequence Property for Damped Systems — Ji-Seong Jo, Man-Gi Ko, Sang-Won Cho, and In-Won Lee; 132 (7), 785-9 (2006).

Elastic analysis

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Elasticity

Finite-Element Analysis of Hot Mix Asphalt Microstructure Using Effective Local Material Properties and Strain Gradient Elasticity — Samer Dessouky, Eyad Masad, Dallas Little, and Hussein Zbib; 132 (2), 158-71 (2006).

Symmetric Catenary of a Uniform Elastic Cable of Neo-Hookean Material — A. Valiente; 132 (7), 747-53 (2006).

Effective Moduli of Coated Particulate Composites with BCC Structure at High Concentration — Hossein M. Shodja and Farshid Roumi; 132 (8), 882-8 (2006).

Postbuckling of Elastic Columns with Second-Mode Imperfection — Raymond H. Plaut, David A. Dillard, and Lawrence N. Virgin; 132 (8), 898-901 (2006).

Three-Dimensional Indirect Boundary Element Method Formulation for Dynamic Analysis of Frames Buried in Semiinfinite Elastic Media — Federico Pinto and Carlos A. Prato; 132 (9), 967-78 (2006).

Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).

Elastoplasticity

New Stabilized Finite Element Method Embedded with a Cap Model for the Analysis of Granular Materials — Kaiming Xia and Arif Masud; 132 (3), 250-9 (2006).

Numerical Simulations of Dynamic Instability of Elastic-Plastic Beams — Guowei Ma, Yumin Liu, and Qingming Li; 132 (3), 260-7 (2006).

Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).

Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Electrical equipment

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

Energy

Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

Energy dissipation

Turbulence Dissipation in Stirred Jars — I. P. D. De Silva; 132 (11), 1260-8 (2006).

Energy methods

Shear-Flexural Buckling of Cantilever Columns under Uniformly Distributed Load — M. C. M. Bakker; 132 (11), 1160-7 (2006).

Entropy

Optimal H_∞ Output Feedback Control Systems with Time Delay — Chi-Chang Lin, Chang-Ching Chang, and Huang-Lin Chen; 132 (10), 1096-105 (2006).

Envelope

Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).

Equation of motion

Accurate Representation of External Force in Time History Analysis — Shuenn-Yih Chang; 132 (1), 34-45 (2006).

Equations of state

Galerkin Solution for Linear Stochastic Algebraic Equations — Mircea Grigoriu; 132 (12), 1277-89 (2006).

Equilibrium

The Most Degrading Postbuckling Mode of Pin-Jointed Structures — M. D. Davister; 132 (7), 775-9 (2006).

Errors

Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

Excitation

Optimal Vibration Absorber with Nonlinear Viscous Power Law Damping and White Noise Excitation — F. Rüdinger; 132 (1), 46-53 (2006).

Auto-Parametric Vibration of a Cable-Stayed-Beam Structure under Random Excitation — Yong Xia and Yozo Fujino; 132 (3), 279-86 (2006).

Dynamic Behavior of Nonlinear Cable System. IV — H. Dai and D. A. Gasparini; 132 (3), 287-94 (2006).

Equivalent Linearization for the Nonstationary Response Analysis of Nonlinear Systems with Random Parameters — Ching-Tung Huang and Wilfred D. Iwan; 132 (5), 465-74 (2006).

Optimal Nonlocal and Asymmetric Structural Damping Using Regenerative Force Actuation Networks — J. T. Scruggs and W. D. Iwan; 132 (9), 932-40 (2006).

Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).

Experimental data

Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Experimentation

Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer, and Erik A. Johnson; 132 (3), 268-78 (2006).

Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).

External pressure

Postbuckling of Moderately Thick Imperfect Rings under External Pressure — Deokjoo Kim and Reaz A. Chaudhuri; 132 (11), 1273-6 (2006).

Failure loads

Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97

(2006).

Failure modes

Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).

Failures

Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).

Fatigue

Probability of Fatigue Failure in Steel Catenary Risers in Deep Water — Tapan K. Sen; 132 (9), 1001-6 (2006).

Feedback

Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).

Feedback control

Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).

Fiber reinforced materials

Upsetting Tests of Fresh Cementitious Composites for Extrusion — Xiangming Zhou and Zongjin Li; 132 (2), 149-57 (2006).

Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).

Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).

Fiber reinforced plastics

Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).

Fiber reinforced polymers

Multiscale Nonlinear Framework for the Long-Term Behavior of Layered Composite Structures — Rami Haj-Ali and Anastasia H. Muliana; 132 (12), 1354-62 (2006).

Fibers

Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).

Filters

Bayesian State Estimation Method for Nonlinear Systems and Its Application to Recorded Seismic Response — Jianye Ching, James L. Beck, Keith A. Porter, and Rustem Shaikhutdinov; 132 (4), 396-410 (2006).

Finite difference method

Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).

Finite element method

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Application of Graded Finite Elements for Asphalt Pavements — William G. Buttlar, Glaucio H. Paulino, and Seong Hyeok Song; 132 (3), 240-9 (2006).

New Stabilized Finite Element Method Embedded with a Cap Model for the Analysis of Granular Materials — Kaiming Xia and Arif Masud; 132 (3), 250-9 (2006).

Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).

Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97 (2006).

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Dynamic Response of Closed-Loop System with Uncertain Parameters Using Interval Finite-Element Method — Su Huan Chen and Xiao Ming Zhang; 132 (8), 830-40 (2006).

Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).

Influence of Hopper Eccentricity on Discharge of Cylindrical Mass Flow Silos with Rigid Walls — P. Vidal, A. Couto, F. Ayuga, and M. Guaita; 132 (9), 1026-33 (2006).

Simulation of Crack Propagation in Asphalt Concrete Using an Intrinsic Cohesive Zone Model — Seong Hyeok Song, Glaucio H. Paulino, and William G. Buttlar; 132 (11), 1215-23 (2006).

Natural Frequencies of a Structure with Bounded Uncertainty — Mehdi Modares, Robert L. Mullen, and Rafi L. Muhanna; 132 (12), 1363-71 (2006).

Closed-Form Stiffness Matrix for the Four-Node Quadrilateral Element with a Fully Populated Material Stiffness — C. E. Zhou and F. J. Vecchio; 132 (12), 1392-5 (2006).

Finite elements

Finite-Element Analysis of Hot Mix Asphalt Microstructure Using Effective Local Material Properties and Strain Gradient Elasticity — Samer Dessouky, Eyad Masad, Dallas Little, and Hussein Zbib; 132 (2), 158-71 (2006).

Nonlinear Analysis of Reinforced Concrete Beam–Columns with Bond-Slip — Ashraf Ayoub; 132 (11), 1177-86 (2006).

Flanges

Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Flexibility

Flexibility-Based Damage Localization from Stochastic Realization Results — Dionisio Bernal; 132 (6), 651-8 (2006).

Flexure

Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Floating structures

Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).

Probability of Fatigue Failure in Steel Catenary Risers in Deep Water — Tapan K. Sen; 132 (9), 1001-6 (2006).

Flow visualization

Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).

Fluid-structure interaction

Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).

Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).

Flutter

Revisiting Multimode Coupled Bridge Flutter: Some New Insights — Xinzhong Chen and Ahsan Kareem; 132 (10), 1115-23 (2006).

Foundations

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Fractals

Nondestructive Assessment of Reinforced Concrete Structures Based on Fractal Damage Characteristic Factors — Maosen Cao, Qingwen Ren, and Pizhong Qiao; 132 (9), 924-31 (2006).

Fracture

Toward a Physical Damage Variable for Concrete — Eric N. Landis; 132 (7), 771-4 (2006).

Size Effect on Strength of Quasibrittle Structures with Reentrant Corners Symmetrically Loaded in Tension — Zdeněk P. Bažant and Qiang Yu; 132 (11), 1168-76 (2006).

Fracture mechanics

Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).

Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).

Fractures

Application of Graded Finite Elements for Asphalt Pavements — William G. Buttlar, Glaucio H. Paulino, and Seong Hyeok Song; 132 (3), 240-9 (2006).

Fracture Analysis of Shear Deformable Bi-Material Interface — Jialai Wang and Pizhong Qiao; 132 (3), 306-16 (2006).

Normal Transmission of S-Wave Across Parallel

Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).

Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).

Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).

Fracture Mechanics Based Model for Joints under Cyclic Loading — Eric Puntel, Gabriella Bolzon, and Victor E. Saouma; 132 (11), 1151-9 (2006).

Simulation of Crack Propagation in Asphalt Concrete Using an Intrinsic Cohesive Zone Model — Seong Hyeok Song, Glaucio H. Paulino, and William G. Buttlar; 132 (11), 1215-23 (2006).

Framed structures

Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).

Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).

Cross-Modal Strain Energy Method for Estimating Damage Severity — Sau-Lon James Hu, Shuqing Wang, and Huajun Li; 132 (4), 429-37 (2006).

Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Frames

Three-Dimensional Indirect Boundary Element Method Formulation for Dynamic Analysis of Frames Buried in Semiinfinite Elastic Media — Federico Pinto and Carlos A. Prato; 132 (9), 967-78 (2006).

Free surfaces

Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Frequency

Three-Dimensional Free Vibration Analysis of Multiphase Piezocomposite Structures — Mohammad T. Kamali and Hossein M. Shodja; 132 (8), 871-81 (2006).

Frequency analysis

Damping in Shear Beam Structures and Estimation of Drift Response — M. Sasani, N. Makris, and B. A. Bolt; 132 (8), 851-8 (2006).

Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).

Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Friction

Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Friction resistance

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Gaussian process

Evaluation of Karhunen–Loève, Spectral, and Sampling Representations for Stochastic Processes — Mircea Grigoriu; 132 (2), 179-89 (2006).

Geometry

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. I: Formulation — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1290-300 (2006).

Girders

Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Granular materials

New Stabilized Finite Element Method Embedded with a Cap Model for the Analysis of Granular Materials — Kaiming Xia and Arif Masud; 132 (3), 250-9 (2006).

Input Parameters of Discrete Element Methods — Tang-Tat Ng; 132 (7), 723-9 (2006).

Effect of Contact Force Models on Granular Flow Dynamics — Shunying Ji and Hayley H. Shen; 132 (11), 1252-9 (2006).

Granular media

Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).

Greens function

Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Ground motion

Ground Motion Induced by Train Passage — Roberto Paolucci and Davide Spinelli; 132 (2), 201-10 (2006).

Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).

Gypsum

Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).

Heat transfer

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Heterogeneity

Simulation of Multidimensional Binary Random Fields with Application to Modeling of Two-Phase Random Media — Phaedon S. Koutsourelakis and George Deodatis; 132 (6), 619-31 (2006).

Highways

Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).

Hydrodynamics

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Hydrostatic pressure

Postbuckling of Moderately Thick Imperfect Rings under External Pressure — Deokjoo Kim and Reaz A. Chaudhuri; 132 (11), 1273-6 (2006).

Hysteresis

Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. I: Formulation — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1290-300 (2006).

Identification

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).

Impact

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Imperfections

Postbuckling Analysis of Geometrically Imperfect Conical Shells — Mahmood Jabareen and Izhak Sheinman; 132 (12), 1326-34 (2006).

Inelastic action

Identification and Interpretation of Microplane Material Laws — Michael Leukart and Ekkehard Ramm; 132 (3), 295-305 (2006).

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Interfaces

Fracture Analysis of Shear Deformable Bi-Material Interface — Jialai Wang and Pizhong Qiao; 132 (3), 306-16 (2006).

Determination of Nonlinear Softening Behavior at

FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).

Three-Dimensional Free Vibration Analysis of Multiphase Piezocomposite Structures — Mohammad T. Kamali and Hossein M. Shodja; 132 (8), 871-81 (2006).

Fracture Mechanics Based Model for Joints under Cyclic Loading — Eric Puntel, Gabriella Bolzon, and Victor E. Saouma; 132 (11), 1151-9 (2006).

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Isotropy

Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Japan

Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).

Jets

Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).

Joints

The Most Degrading Postbuckling Mode of Pin-Jointed Structures — M. D. Davister; 132 (7), 775-9 (2006).

Fracture Mechanics Based Model for Joints under Cyclic Loading — Eric Puntel, Gabriella Bolzon, and Victor E. Saouma; 132 (11), 1151-9 (2006).

Kaolin

Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Laboratory tests

Viscoelastic Modeling and Field Validation of Flexible Pavements — Mostafa A. Elseifi, Imad L. Al-Qadi, and Pyeong Jun Yoo; 132 (2), 172-8 (2006).

Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).

Spatial and Temporal Characteristics of Transient Extreme Wave Profiles on Depth-Varying Currents — Aifeng Yao and Chin H. Wu; 132 (9), 1015-25 (2006).

Force Identification Based on Sensitivity in Time Domain — Z. R. Lu and S. S. Law; 132 (10), 1050-6 (2006).

Lagrange's equations

Lagrangian Approach to Structural Collapse Simulation — Mettupalayam V. Sivaselvan and Andrei M. Reinhorn; 132 (8), 795-805 (2006).

Laminates

Thermomechanical Postbuckling Analysis of Cross-Ply Laminated Cylindrical Shell Panels — J. Girish and L. S. Ramachandra; 132 (2), 133-40 (2006).

System Identification of Partially Restrained Composite Plates Using Measured Natural Frequencies — C. R. Lee and T. Y. Kam; 132 (8), 841-50 (2006).

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Nonlinear Response of Laminated Cylindrical Shell Panels Subjected to Thermomechanical Loads — Maloy K. Singha, L. S. Ramachandra, and J. N. Bandyopadhyay; 132 (10), 1088-95 (2006).

Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).

Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).

Linear systems

Effect of Internal Moment Release on the Eigenfrequencies of Combined Linear Systems — Hamid Seyyedian; 132 (8), 823-9 (2006).

Liquefaction

Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Loading rate

Behavior of One-Dimensional Consolidation under Time-Dependent Loading — Tung-Wen Hsu and Shuan-Chai Lu; 132 (4), 457-62 (2006).

Loads

Buckling of Simply Supported Rectangular Reissner–Mindlin Plates Subjected to Linearly Varying In-Plane Loading — Hongzhi Zhong and Chao Gu; 132 (5), 578-81 (2006).

Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).

Localization

Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Loops

Dynamic Response of Closed-Loop System with Uncertain Parameters Using Interval Finite-Element Method — Su Huan Chen and Xiao Ming Zhang; 132 (8), 830-40 (2006).

Magnetic fields

Dynamic Stability of Ferromagnetic Beam-Plates with Magnetoelastic Interaction and Magnetic Damping in Transverse Magnetic Fields — Xingzhe Wang and Jong Seh Lee; 132 (4), 422-8 (2006).

Mass transfer

Impact of Limiters on Accuracy of High-Resolution Flow and Transport Models — Brett F. Sanders and Scott F. Bradford; 132 (1), 87-98 (2006).

Material properties

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Application of Graded Finite Elements for Asphalt Pavements — William G. Buttlar, Glaucio H. Paulino, and Seong Hyeok Song; 132 (3), 240-9 (2006).

Identification and Interpretation of Microplane Material Laws — Michael Leukart and Ekkehard Ramm; 132 (3), 295-305 (2006).

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).

Materials

Simulation of Multidimensional Binary Random Fields with Application to Modeling of Two-Phase Random Media — Phaedon S. Koutsourelakis and George Deodatis; 132 (6), 619-31 (2006).

Mathematical models

Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Mathematics

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. I: Formulation — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1290-300 (2006).

Mechanics

Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).

Metals

Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97 (2006).

Micromechanics

Finite-Element Analysis of Hot Mix Asphalt Microstructure Using Effective Local Material Properties and Strain Gradient Elasticity — Samer Dessouky, Eyad Masad, Dallas Little, and Hussein Zbib; 132 (2), 158-71 (2006).

Effective Medium Theories for Multicomponent Poroelastic Composites — James G. Berryman; 132 (5), 519-31 (2006).

Input Parameters of Discrete Element Methods — Tang-Tat Ng; 132 (7), 723-9 (2006).

Effective Moduli of Coated Particulate Composites with BCC Structure at High Concentration — Hossein M. Shodja and Farshid Roumi; 132 (8), 882-8 (2006).

A Stochastic Transformation Field Theory for Het-

erogeneous Materials — Todd O. Williams; 132 (11), 1224-40 (2006).

Microstructures
Toward a Physical Damage Variable for Concrete — Eric N. Landis; 132 (7), 771-4 (2006).

Mixtures
Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).

Modal analysis
Cross-Modal Strain Energy Method for Estimating Damage Severity — Sau-Lon James Hu, Shuqing Wang, and Huajun Li; 132 (4), 429-37 (2006).

Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

Models
Identification and Modeling of Permanent Deformations of Asphalt Concrete — Saurabh Bahuguna, Vassilis P. Panoskaltsis, and Katerina D. Papoulia; 132 (3), 231-9 (2006).

Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).

Effect of Contact Force Models on Granular Flow Dynamics — Shunying Ji and Hayley H. Shen; 132 (11), 1252-9 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. I: Formulation — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1290-300 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. II: Applications — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1301-12 (2006).

Unified Sand Model Based on the Critical State and Generalized Plasticity — Hoe I. Ling and Songtao Yang; 132 (12), 1380-91 (2006).

Moisture
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

Monte Carlo method
Evaluation of Karhunen–Loève, Spectral, and Sampling Representations for Stochastic Processes — Mircea Grigoriu; 132 (2), 179-89 (2006).

Galerkin Solution for Linear Stochastic Algebraic Equations — Mircea Grigoriu; 132 (12), 1277-89 (2006).

Mooring
Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Motion
Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).

Natural frequency
System Identification of Partially Restrained Composite Plates Using Measured Natural Frequencies — C. R. Lee and T. Y. Kam; 132 (8), 841-50 (2006).

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Natural Frequencies of a Structure with Bounded Uncertainty — Mehdi Modares, Robert L. Mullen, and Rafi L. Muhanna; 132 (12), 1363-71 (2006).

Nearshore circulation
Fully Nonlinear Boussinesq-Type Equations for Waves and Currents over Porous Beds — Qin Chen; 132 (2), 220-30 (2006).

Networks
Optimal Nonlocal and Asymmetric Structural Damping Using Regenerative Force Actuation Networks — J. T. Scruggs and W. D. Iwan; 132 (9), 932-40 (2006).

Neural networks
New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. I: Formulation — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1290-300 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. II: Applications — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1301-12 (2006).

Nonlinear analysis
Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Nonlinear Analytical Solution for Cable Truss — Stanislav Kmet and Zuzana Kokorudova; 132 (1), 119-23 (2006).

New Stabilized Finite Element Method Embedded with a Cap Model for the Analysis of Granular Materials — Kaiming Xia and Arif Masud; 132 (3), 250-9 (2006).

Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).

Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Axisymmetric Nonlinear Stability of a Shallow Conical Shell with a Spherical Cap of Arbitrary Variable Shell Thickness — Chao-Sheng Hou, Yue Yin, and Cheng-Bo Wang; 132 (10), 1146-9 (2006).

Nonlinear Analysis of Reinforced Concrete Beam–Columns with Bond-Slip — Ashraf Ayoub; 132 (11), 1177-86 (2006).

Postbuckling of Moderately Thick Imperfect Rings under External Pressure — Deokjoo Kim and Reaz A. Chaudhuri; 132 (11), 1273-6 (2006).

Nonlinear differential equations
Postbuckling of Beam Subjected to Intermediate Follower Force — B. Phungpaingam, S. Chucheepsakul, and C. M. Wang; 132 (1), 16-25 (2006).

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

Nonlinear response
Dynamic Behavior of Nonlinear Cable System. IV — H. Dai and D. A. Gasparini; 132 (3), 287-94 (2006).

Fully Nonhydrostatic Modeling of Surface Waves — Hengliang Yuan and Chin H. Wu; 132 (4), 447-56 (2006).

Equivalent Linearization for the Nonstationary Response Analysis of Nonlinear Systems with Random Parameters — Ching-Tung Huang and Wilfred D. Iwan; 132 (5), 465-74 (2006).

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

Nonlinear Response of Laminated Cylindrical Shell Panels Subjected to Thermomechanical Loads — Maloy K. Singha, L. S. Ramachandra, and J. N. Bandyopadhyay; 132 (10), 1088-95 (2006).

Multiscale Nonlinear Framework for the Long-Term Behavior of Layered Composite Structures — Rami Haj-Ali and Anastasia H. Muliana; 132 (12), 1354-62 (2006).

Nonlinear systems
Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).

Notches
Size Effect on Strength of Quasibrittle Structures with Reentrant Corners Symmetrically Loaded in Tension — Zdeněk P. Bažant and Qiang Yu; 132 (11), 1168-76 (2006).

Numerical analysis
Ground Motion Induced by Train Passage — Roberto Paolucci and Davide Spinelli; 132 (2), 201-10 (2006).

Numerical Simulations of Dynamic Instability of Elastic-Plastic Beams — Guowei Ma, Yumin

Liu, and Qingming Li; 132 (3), 260-7 (2006).

The Most Degrading Postbuckling Mode of Pin-Jointed Structures — M. D. Davister; 132 (7), 775-9 (2006).

Numerical models

Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Optimization

Internal Forces for Statically Indeterminate Structures Having Different Moduli in Tension and Compression — Wenjuan Yao and Zhiming Ye; 132 (7), 739-46 (2006).

Optimal Nonlocal and Asymmetric Structural Damping Using Regenerative Force Actuation Networks — J. T. Scruggs and W. D. Iwan; 132 (9), 932-40 (2006).

Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).

Optimization models

Optimal Design with Probabilistic Objective and Constraints — Johannes O. Royset, Armen Der Kiureghian, and Elijah Polak; 132 (1), 107-18 (2006).

Oscillations

Impact of Limiters on Accuracy of High-Resolution Flow and Transport Models — Brett F. Sanders and Scott F. Bradford; 132 (1), 87-98 (2006).

Oscillatory flow

Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).

Overland flow

Impact of Limiters on Accuracy of High-Resolution Flow and Transport Models — Brett F. Sanders and Scott F. Bradford; 132 (1), 87-98 (2006).

Panels

Thermomechanical Postbuckling Analysis of Cross-Ply Laminated Cylindrical Shell Panels — J. Girish and L. S. Ramachandra; 132 (2), 133-40 (2006).

Nonlinear Response of Laminated Cylindrical Shell Panels Subjected to Thermomechanical Loads — Maloy K. Singha, L. S. Ramachandra, and J. N. Bandyopadhyay; 132 (10), 1088-95 (2006).

Parameters

Equivalent Linearization for the Nonstationary Response Analysis of Nonlinear Systems with Random Parameters — Ching-Tung Huang and Wilfred D. Iwan; 132 (5), 465-74 (2006).

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Dynamic Response of Closed-Loop System with Uncertain Parameters Using Interval Finite-Element Method — Su Huan Chen and Xiao Ming Zhang; 132 (8), 830-40 (2006).

System Identification of Partially Restrained Composite Plates Using Measured Natural Frequencies — C. R. Lee and T. Y. Kam; 132 (8), 841-50 (2006).

Force Identification Based on Sensitivity in Time Domain — Z. R. Lu and S. S. Law; 132 (10), 1050-6 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. II: Applications — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1301-12 (2006).

Unified Sand Model Based on the Critical State and Generalized Plasticity — Hoe I. Ling and Songtao Yang; 132 (12), 1380-91 (2006).

Particles

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Passive control

Optimal Vibration Absorber with Nonlinear Viscous Power Law Damping and White Noise Excitation — F. Rüdinger; 132 (1), 46-53 (2006).

Pavement design

Viscoelastic Modeling and Field Validation of Flexible Pavements — Mostafa A. Elseifi, Imad L. Al-Qadi, and Pyeong Jun Yoo; 132 (2), 172-8 (2006).

Pavements

Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).

Stochastic Spatial Excitation Induced by a Distributed Contact on Homogenous Gaussian Random Fields — Lu Sun, William Kenis, and Weijun Wang; 132 (7), 714-22 (2006).

Piezoelectricity

Three-Dimensional Free Vibration Analysis of Multiphase Piezocomposite Structures — Mohammad T. Kamali and Hossein M. Shodja; 132 (8), 871-81 (2006).

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Plastic hinges

Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).

Plasticity

Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).

Unified Sand Model Based on the Critical State and Generalized Plasticity — Hoe I. Ling and Songtao Yang; 132 (12), 1380-91 (2006).

Plates

Dynamic Stability of Ferromagnetic Beam-Plates with Magnetoelastic Interaction and Magnetic Damping in Transverse Magnetic Fields — Xingzhe Wang and Jong Seh Lee; 132 (4), 422-8 (2006).

Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97 (2006).

Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Buckling of Simply Supported Rectangular Reissner–Mindlin Plates Subjected to Linearly Varying In-Plane Loading — Hongzhi Zhong and Chao Gu; 132 (5), 578-81 (2006).

System Identification of Partially Restrained Composite Plates Using Measured Natural Frequencies — C. R. Lee and T. Y. Kam; 132 (8), 841-50 (2006).

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).

Wave Interaction with a Flexible Porous Breakwater in a Two-Layer Fluid — P. Suresh Kumar and T. Sahoo; 132 (9), 1007-14 (2006).

Pore water pressure

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Poroelasticity

Effective Medium Theories for Multicomponent Poroelastic Composites — James G. Berryman; 132 (5), 519-31 (2006).

Porochemoelastic Solution for an Inclined Borehole in a Transversely Isotropic Formation — Shailesh Ekbote and Younane Abousleiman; 132 (7), 754-63 (2006).

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Porosity

Compressibility Moduli for Porous Materials Incorporating Volume Fraction — Lynn S. Bennethum; 132 (11), 1205-14 (2006).

Porous materials

Compressibility Moduli for Porous Materials Incorporating Volume Fraction — Lynn S. Bennethum; 132 (11), 1205-14 (2006).

Porous media

Fully Nonlinear Boussinesq-Type Equations for Waves and Currents over Porous Beds — Qin Chen; 132 (2), 220-30 (2006).

Effective Medium Theories for Multicomponent Poroelastic Composites — James G. Berryman; 132 (5), 519-31 (2006).

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Wave Interaction with a Flexible Porous Breakwater in a Two-Layer Fluid — P. Suresh Kumar and T. Sahoo; 132 (9), 1007-14 (2006).

Turbulent Boundary Layer Flows Above a Porous Surface Subject to Flow Injection — Pengzhi Lin and S. A. S. A. Karunarathna; 132 (10), 1133-40 (2006).

Postbuckling

Postbuckling of Beam Subjected to Intermediate Follower Force — B. Phungpaingam, S. Chucheepsakul, and C. M. Wang; 132 (1), 16-25 (2006).

Thermomechanical Postbuckling Analysis of Cross-Ply Laminated Cylindrical Shell Panels — J. Girish and L. S. Ramachandra; 132 (2), 133-40 (2006).

The Most Degrading Postbuckling Mode of Pin-Jointed Structures — M. D. Davister; 132 (7), 775-9 (2006).

Postbuckling of Elastic Columns with Second-Mode Imperfection — Raymond H. Plaut, David A. Dillard, and Lawrence N. Virgin; 132 (8), 898-901 (2006).

Postbuckling of Moderately Thick Imperfect Rings under External Pressure — Deokjoo Kim and Reaz A. Chaudhuri; 132 (11), 1273-6 (2006).

Postbuckling Analysis of Geometrically Imperfect Conical Shells — Mahmood Jabareen and Izhak Sheinman; 132 (12), 1326-34 (2006).

Predictions

Impact of Limiters on Accuracy of High-Resolution Flow and Transport Models — Brett F. Sanders and Scott F. Bradford; 132 (1), 87-98 (2006).

Theoretical Analysis of Transfer Lengths in Pretensioned Prestressed Concrete Members — Byung Hwan Oh, Eui Sung Kim, and Young Cheol Choi; 132 (10), 1057-66 (2006).

Pressures

Compressibility Moduli for Porous Materials Incorporating Volume Fraction — Lynn S. Bennethum; 132 (11), 1205-14 (2006).

Prestressing

Theoretical Analysis of Transfer Lengths in Pretensioned Prestressed Concrete Members — Byung Hwan Oh, Eui Sung Kim, and Young Cheol Choi; 132 (10), 1057-66 (2006).

Probabilistic methods

Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).

Probability of Fatigue Failure in Steel Catenary Risers in Deep Water — Tapan K. Sen; 132 (9), 1001-6 (2006).

Probability

Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).

Optimal Design with Probabilistic Objective and Constraints — Johannes O. Royset, Armen Der Kiureghian, and Elijah Polak; 132 (1), 107-18 (2006).

Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).

Radial flow

Turbulence Dissipation in Stirred Jars — I. P. D. De Silva; 132 (11), 1260-8 (2006).

Radiography

Toward a Physical Damage Variable for Concrete — Eric N. Landis; 132 (7), 771-4 (2006).

Railroad tracks

Ground Motion Induced by Train Passage — Roberto Paolucci and Davide Spinelli; 132 (2), 201-10 (2006).

Railroad trains

Ground Motion Induced by Train Passage — Roberto Paolucci and Davide Spinelli; 132 (2), 201-10 (2006).

Random processes

Simulation of Multidimensional Binary Random Fields with Application to Modeling of Two-Phase Random Media — Phaedon S. Koutsourelakis and George Deodatis; 132 (6), 619-31 (2006).

Stochastic Spatial Excitation Induced by a Distributed Contact on Homogenous Gaussian Random Fields — Lu Sun, William Kenis, and Weijun Wang; 132 (7), 714-22 (2006).

Random variables

Probability of Fatigue Failure in Steel Catenary Risers in Deep Water — Tapan K. Sen; 132 (9), 1001-6 (2006).

Random vibration

Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).

Evaluation of Karhunen–Loève, Spectral, and Sampling Representations for Stochastic Processes — Mircea Grigoriu; 132 (2), 179-89 (2006).

Random waves

Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Regression analysis

Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).

Reliability

Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Repeated loads

Identification and Modeling of Permanent Deformations of Asphalt Concrete — Saurabh Bahuguna, Vassilis P. Panoskaltsis, and Katerina D. Papoulia; 132 (3), 231-9 (2006).

Reservoirs

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Resonance

Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).

Retrofitting

Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Reynolds number

Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Rigid-body dynamics

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Rock masses

Normal Transmission of S-Wave Across Parallel Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).

Rocks

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Rotation

Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Rubber

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Safety

Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).

Sand

Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).

Unified Sand Model Based on the Critical State and Generalized Plasticity — Hoe I. Ling and Songtao Yang; 132 (12), 1380-91 (2006).

Saturated soils

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Seismic analysis

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89

(2006).

Seismic effects

Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).

Bayesian State Estimation Method for Nonlinear Systems and Its Application to Recorded Seismic Response — Jianye Ching, James L. Beck, Keith A. Porter, and Rustem Shaikhutdinov; 132 (4), 396-410 (2006).

Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).

Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Sensitivity analysis

Force Identification Based on Sensitivity in Time Domain — Z. R. Lu and S. S. Law; 132 (10), 1050-6 (2006).

Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

Postbuckling Analysis of Geometrically Imperfect Conical Shells — Mahmood Jabareen and Izhak Sheinman; 132 (12), 1326-34 (2006).

Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).

Sensors

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Shake table tests

Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).

Shallow waters

Impact of Limiters on Accuracy of High-Resolution Flow and Transport Models — Brett F. Sanders and Scott F. Bradford; 132 (1), 87-98 (2006).

Shear

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Shear-Flexural Buckling of Cantilever Columns under Uniformly Distributed Load — M. C. M. Bakker; 132 (11), 1160-7 (2006).

Shear deformation

Fracture Analysis of Shear Deformable Bi-Material Interface — Jialai Wang and Pizhong Qiao; 132 (3), 306-16 (2006).

Exact Solution of Out-of-Plane Problems of an Arch with Varying Curvature and Cross Section — E. Tufekci and O. Y. Dogruer; 132 (6), 600-9 (2006).

Buckling of Multiwalled Carbon Nanotubes Using Timoshenko Beam Theory — Y. Y. Zhang, C. M. Wang, and V. B. C. Tan; 132 (9), 952-8 (2006).

Shear strength

Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).

Shear stress

Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Turbulent Boundary Layer Flows Above a Porous Surface Subject to Flow Injection — Pengzhi Lin and S. A. S. A. Karunarathna; 132 (10), 1133-40 (2006).

Shear waves

Spatial and Temporal Characteristics of Transient Extreme Wave Profiles on Depth-Varying Currents — Aifeng Yao and Chin H. Wu; 132 (9), 1015-25 (2006).

On the Comparison of Timoshenko and Shear Models in Beam Dynamics — Noël Challamel; 132 (10), 1141-5 (2006).

Shells

Axisymmetric Nonlinear Stability of a Shallow Conical Shell with a Spherical Cap of Arbitrary Variable Shell Thickness — Chao-Sheng Hou, Yue Yin, and Cheng-Bo Wang; 132 (10), 1146-9 (2006).

Postbuckling Analysis of Geometrically Imperfect Conical Shells — Mahmood Jabareen and Izhak Sheinman; 132 (12), 1326-34 (2006).

Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).

Silos

Influence of Hopper Eccentricity on Discharge of Cylindrical Mass Flow Silos with Rigid Walls — P. Vidal, A. Couto, F. Ayuga, and M. Guaita; 132 (9), 1026-33 (2006).

Simulation

Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Numerical Simulations of Dynamic Instability of Elastic-Plastic Beams — Guowei Ma, Yumin Liu, and Qingming Li; 132 (3), 260-7 (2006).

Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Bayesian State Estimation Method for Nonlinear Systems and Its Application to Recorded Seismic Response — Jianye Ching, James L. Beck, Keith A. Porter, and Rustem Shaikhutdinov; 132 (4), 396-410 (2006).

Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).

Simulation of Multidimensional Binary Random Fields with Application to Modeling of Two-Phase Random Media — Phaedon S. Koutsourelakis and George Deodatis; 132 (6), 619-31 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Lagrangian Approach to Structural Collapse Simulation — Mettupalayam V. Sivaselvan and Andrei M. Reinhorn; 132 (8), 795-805 (2006).

Simulation of Crack Propagation in Asphalt Concrete Using an Intrinsic Cohesive Zone Model — Seong Hyeok Song, Glaucio H. Paulino, and William G. Buttlar; 132 (11), 1215-23 (2006).

Size effect

Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).

Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

Size Effect on Strength of Quasibrittle Structures with Reentrant Corners Symmetrically Loaded in Tension — Zdeněk P. Bažant and Qiang Yu; 132 (11), 1168-76 (2006).

Slabs

Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Sliding

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Slip

Nonlinear Analysis of Reinforced Concrete Beam–Columns with Bond-Slip — Ashraf Ayoub; 132 (11), 1177-86 (2006).

Slope stability

Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Slopes

Analytical Study of Turbulent Pollutant Dispersion near a Low Hill — Andy T. Chan, Natalia T. N. Lai, and Pradeep G. Siddheshwar; 132 (1), 99-106 (2006).

Antiplane (SH) Waves Diffraction by a Semicircular Cylindrical Hill Revisited: An Improved Analytic Wave Series Solution — Vincent W. Lee, Hao Luo, and Jianwen Liang; 132 (10), 1106-14 (2006).

Soil dynamics

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Solids flow
Effect of Contact Force Models on Granular Flow Dynamics — Shunying Ji and Hayley H. Shen; 132 (11), 1252-9 (2006).

Solitary waves
Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).

Solutions
Accurate Representation of External Force in Time History Analysis — Shuenn-Yih Chang; 132 (1), 34-45 (2006).

Sorption
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

Spalling
Analyses of Heated Concrete Spalling due to Restrained Thermal Dilation: Application to the "Chunnel" Fire — Y. Msaad and G. Bonnet; 132 (10), 1124-32 (2006).

Spatial analysis
Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).

Spectral analysis
Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Spherical shells
Identification and Modeling of Permanent Deformations of Asphalt Concrete — Saurabh Bahuguna, Vassilis P. Panoskaltsis, and Katerina D. Papoulia; 132 (3), 231-9 (2006).

Stability
Time-Delayed Positive Velocity Feedback Control Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Postbuckling Analysis of Geometrically Imperfect Conical Shells — Mahmood Jabareen and Izhak Sheinman; 132 (12), 1326-34 (2006).

Stability analysis
Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Shear-Flexural Buckling of Cantilever Columns under Uniformly Distributed Load — M. C. M. Bakker; 132 (11), 1160-7 (2006).

Static loads
Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

Stationary processes
Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Steel
Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).

Steel frames
Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).

Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).

Steel pipes
Probability of Fatigue Failure in Steel Catenary Risers in Deep Water — Tapan K. Sen; 132 (9), 1001-6 (2006).

Stiffness
Short-Term Structural Instability under Random Dynamic Loads — M. Dimentberg, D. Iourtchenko, and A. Naess; 132 (11), 1269-72 (2006).

Closed-Form Stiffness Matrix for the Four-Node Quadrilateral Element with a Fully Populated Material Stiffness — C. E. Zhou and F. J. Vecchio; 132 (12), 1392-5 (2006).

Stochastic models
Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

A Stochastic Transformation Field Theory for Heterogeneous Materials — Todd O. Williams; 132 (11), 1224-40 (2006).

Stochastic process
Optimal Vibration Absorber with Nonlinear Viscous Power Law Damping and White Noise Excitation — F. Rüdinger; 132 (1), 46-53 (2006).

Stochastic processes
Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).

Evaluation of Karhunen–Loève, Spectral, and Sampling Representations for Stochastic Processes — Mircea Grigoriu; 132 (2), 179-89 (2006).

Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).

Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).

Flexibility-Based Damage Localization from Stochastic Realization Results — Dionisio Bernal; 132 (6), 651-8 (2006).

Galerkin Solution for Linear Stochastic Algebraic Equations — Mircea Grigoriu; 132 (12), 1277-89 (2006).

Strain
Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Strain energy
Cross-Modal Strain Energy Method for Estimating Damage Severity — Sau-Lon James Hu, Shuqing Wang, and Huajun Li; 132 (4), 429-37 (2006).

Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

Strain rate
Upsetting Tests of Fresh Cementitious Composites for Extrusion — Xiangming Zhou and Zongjin Li; 132 (2), 149-57 (2006).

Strain softening
Damage Theory Based on Composite Mechanics — Yunping Xi, Morteza Eskandari-Ghadi, Suwito, and Stein Sture; 132 (11), 1195-204 (2006).

Strength
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

Stress
Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Stress concentration
Size Effect on Strength of Quasibrittle Structures with Reentrant Corners Symmetrically Loaded in Tension — Zdeněk P. Bažant and Qiang Yu; 132 (11), 1168-76 (2006).

Stress intensity factor
Computation of Mixed-Mode Stress Intensity Factors for Cracks in Three-Dimensional Functionally Graded Solids — Matthew C. Walters, Glaucio H. Paulino, and Robert H. Dodds; 132 (1), 1-15 (2006).

Stress strain relations
Effect of Contact Force Models on Granular Flow Dynamics — Shunying Ji and Hayley H. Shen; 132 (11), 1252-9 (2006).

Structural analysis
Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Natural Frequencies of a Structure with Bounded Uncertainty — Mehdi Modares, Robert L. Mullen, and Rafi L. Muhanna; 132 (12), 1363-71 (2006).

Structural control
Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer, and Erik A. Johnson; 132 (3), 268-78 (2006).

Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Time-Delayed Positive Velocity Feedback Control

Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).

Optimal Nonlocal and Asymmetric Structural Damping Using Regenerative Force Actuation Networks -– J. T. Scruggs and W. D. Iwan; 132 (9), 932-40 (2006).

Structural design

Optimal Design with Probabilistic Objective and Constraints — Johannes O. Royset, Armen Der Kiureghian, and Elijah Polak; 132 (1), 107-18 (2006).

Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).

Structural dynamics

Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).

Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).

On the Comparison of Timoshenko and Shear Models in Beam Dynamics — Noël Challamel; 132 (10), 1141-5 (2006).

Structural members

Theoretical Analysis of Transfer Lengths in Pretensioned Prestressed Concrete Members — Byung Hwan Oh, Eui Sung Kim, and Young Cheol Choi; 132 (10), 1057-66 (2006).

Structural reliability

Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).

Structural safety

Lagrangian Approach to Structural Collapse Simulation — Mettupalayam V. Sivaselvan and Andrei M. Reinhorn; 132 (8), 795-805 (2006).

Structural stability

Auto-Parametric Vibration of a Cable-Stayed-Beam Structure under Random Excitation — Yong Xia and Yozo Fujino; 132 (3), 279-86 (2006).

Shear-Flexural Buckling of Cantilever Columns under Uniformly Distributed Load — M. C. M. Bakker; 132 (11), 1160-7 (2006).

Short-Term Structural Instability under Random Dynamic Loads — M. Dimentberg, D. Iourtchenko, and A. Naess; 132 (11), 1269-72 (2006).

Substrates

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Subsystems

Effect of Internal Moment Release on the Eigenfrequencies of Combined Linear Systems — Hamid Seyyedian; 132 (8), 823-9 (2006).

Suction

Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).

Surface waves

Fully Nonhydrostatic Modeling of Surface Waves — Hengliang Yuan and Chin H. Wu; 132 (4), 447-56 (2006).

Symmetry

Symmetric Catenary of a Uniform Elastic Cable of Neo-Hookean Material — A. Valiente; 132 (7), 747-53 (2006).

System reliability

Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).

Temperature effects

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Tensile stress

Determining the Tensile Stress-Crack Opening Curve of Concrete by Inverse Analysis — José Luiz Antunes de Oliveira e Sousa and Ravindra Gettu; 132 (2), 141-8 (2006).

Tension

Internal Forces for Statically Indeterminate Structures Having Different Moduli in Tension and Compression — Wenjuan Yao and Zhiming Ye; 132 (7), 739-46 (2006).

Tension structures

Nonlinear Analytical Solution for Cable Truss — Stanislav Kmet and Zuzana Kokorudova; 132 (1), 119-23 (2006).

Tests

Determining the Tensile Stress-Crack Opening Curve of Concrete by Inverse Analysis — José Luiz Antunes de Oliveira e Sousa and Ravindra Gettu; 132 (2), 141-8 (2006).

Theories

A Stochastic Transformation Field Theory for Heterogeneous Materials — Todd O. Williams; 132 (11), 1224-40 (2006).

Thermal factors

Analyses of Heated Concrete Spalling due to Restrained Thermal Dilation: Application to the "Chunnel" Fire — Y. Msaad and G. Bonnet; 132 (10), 1124-32 (2006).

Thermal stresses

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Thermodynamics

Identification and Interpretation of Microplane Material Laws — Michael Leukart and Ekkehard Ramm; 132 (3), 295-305 (2006).

Compressibility Moduli for Porous Materials Incorporating Volume Fraction — Lynn S. Bennethum; 132 (11), 1205-14 (2006).

Thermoelasticity

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Thickness

Vibration of Open Cylindrical Shells with Stepped Thickness Variations — L. Zhang and Y. Xiang; 132 (7), 780-4 (2006).

Axisymmetric Nonlinear Stability of a Shallow Conical Shell with a Spherical Cap of Arbitrary Variable Shell Thickness — Chao-Sheng Hou, Yue Yin, and Cheng-Bo Wang; 132 (10), 1146-9 (2006).

Postbuckling of Moderately Thick Imperfect Rings under External Pressure — Deokjoo Kim and Reaz A. Chaudhuri; 132 (11), 1273-6 (2006).

Thin wall sections

Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).

Three-dimensional analysis

Computation of Mixed-Mode Stress Intensity Factors for Cracks in Three-Dimensional Functionally Graded Solids — Matthew C. Walters, Glaucio H. Paulino, and Robert H. Dodds; 132 (1), 1-15 (2006).

Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).

Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).

Three-Dimensional Free Vibration Analysis of Multiphase Piezocomposite Structures — Mohammad T. Kamali and Hossein M. Shodja; 132 (8), 871-81 (2006).

Time dependence

Behavior of One-Dimensional Consolidation under Time-Dependent Loading — Tung-Wen Hsu and Shuan-Chai Lu; 132 (4), 457-62 (2006).

Porochemoelastic Solution for an Inclined Borehole in a Transversely Isotropic Formation — Shailesh Ekbote and Younane Abousleiman; 132 (7), 754-63 (2006).

Time factors

Accurate Representation of External Force in Time History Analysis — Shuenn-Yih Chang; 132 (1), 34-45 (2006).

Time series analysis

Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Tires

Stochastic Spatial Excitation Induced by a Distributed Contact on Homogenous Gaussian Random Fields — Lu Sun, William Kenis, and Weijun Wang; 132 (7), 714-22 (2006).

Topography

Analytical Study of Turbulent Pollutant Dispersion near a Low Hill — Andy T. Chan, Natalia T. N. Lai, and Pradeep G. Siddheshwar; 132 (1), 99-106 (2006).

Torsion

Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Transformations

Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Transient flow

Spatial and Temporal Characteristics of Transient Extreme Wave Profiles on Depth-Varying Currents — Aifeng Yao and Chin H. Wu; 132 (9), 1015-25 (2006).

Transient loads

Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).

Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Transient response

Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).

Transverse loads

Numerical Simulations of Dynamic Instability of Elastic-Plastic Beams — Guowei Ma, Yumin Liu, and Qingming Li; 132 (3), 260-7 (2006).

Triaxial compression

Input Parameters of Discrete Element Methods — Tang-Tat Ng; 132 (7), 723-9 (2006).

Triaxial test

Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Trusses

Nonlinear Analytical Solution for Cable Truss — Stanislav Kmet and Zuzana Kokorudova; 132 (1), 119-23 (2006).

Turbulent flow

Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Turbulence Dissipation in Stirred Jars — I. P. D. De Silva; 132 (11), 1260-8 (2006).

Two-dimensional models

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Ultimate strength

Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and Atle Gjelsvik; 132 (6), 594-9 (2006).

Uncertainty principles

Equivalent Linearization for the Nonstationary Response Analysis of Nonlinear Systems with Random Parameters — Ching-Tung Huang and Wilfred D. Iwan; 132 (5), 465-74 (2006).

Natural Frequencies of a Structure with Bounded Uncertainty — Mehdi Modares, Robert L. Mullen, and Rafi L. Muhanna; 132 (12), 1363-71 (2006).

Uniform flow

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Unsaturated soils

Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).

Validation

Viscoelastic Modeling and Field Validation of Flexible Pavements — Mostafa A. Elseifi, Imad L. Al-Qadi, and Pyeong Jun Yoo; 132 (2), 172-8 (2006).

Vector analysis

Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).

Vehicles

Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).

Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).

Stochastic Spatial Excitation Induced by a Distributed Contact on Homogenous Gaussian Random Fields — Lu Sun, William Kenis, and Weijun Wang; 132 (7), 714-22 (2006).

Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).

Velocity

Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Normal Transmission of S-Wave Across Parallel Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).

Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Time-Delayed Positive Velocity Feedback Control Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Turbulent Boundary Layer Flows Above a Porous Surface Subject to Flow Injection — Pengzhi Lin and S. A. S. A. Karunarathna; 132 (10), 1133-40 (2006).

Verification

Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer, and Erik A. Johnson; 132 (3), 268-78 (2006).

Vibration

Optimal Vibration Absorber with Nonlinear Viscous Power Law Damping and White Noise Excitation — F. Rüdinger; 132 (1), 46-53 (2006).

Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).

Ground Motion Induced by Train Passage — Roberto Paolucci and Davide Spinelli; 132 (2), 201-10 (2006).

Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer, and Erik A. Johnson; 132 (3), 268-78 (2006).

Auto-Parametric Vibration of a Cable-Stayed-Beam Structure under Random Excitation — Yong Xia and Yozo Fujino; 132 (3), 279-86 (2006).

Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).

Flexibility-Based Damage Localization from Stochastic Realization Results — Dionisio Bernal; 132 (6), 651-8 (2006).

Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Vibration of Open Cylindrical Shells with Stepped Thickness Variations — L. Zhang and Y. Xiang; 132 (7), 780-4 (2006).

Effect of Internal Moment Release on the Eigenfrequencies of Combined Linear Systems — Hamid Seyyedian; 132 (8), 823-9 (2006).

Dynamic Response of Closed-Loop System with Uncertain Parameters Using Interval Finite-Element Method — Su Huan Chen and Xiao Ming Zhang; 132 (8), 830-40 (2006).

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Three-Dimensional Free Vibration Analysis of Multiphase Piezocomposite Structures — Mohammad T. Kamali and Hossein M. Shodja; 132 (8), 871-81 (2006).

Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).

Viscoelasticity

Viscoelastic Modeling and Field Validation of Flexible Pavements — Mostafa A. Elseifi, Imad L. Al-Qadi, and Pyeong Jun Yoo; 132 (2), 172-8 (2006).

Behavior of One-Dimensional Consolidation under Time-Dependent Loading — Tung-Wen Hsu and Shuan-Chai Lu; 132 (4), 457-62 (2006).

Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Vortex shedding
Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).

Warpage
Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).

Water depth
Wave Interaction with a Flexible Porous Breakwater in a Two-Layer Fluid — P. Suresh Kumar and T. Sahoo; 132 (9), 1007-14 (2006).

Water waves
Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).

Fully Nonlinear Boussinesq-Type Equations for Waves and Currents over Porous Beds — Qin Chen; 132 (2), 220-30 (2006).

Wave dispersion
Fully Nonhydrostatic Modeling of Surface Waves — Hengliang Yuan and Chin H. Wu; 132 (4), 447-56 (2006).

Wave equations
Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Wave propagation
Fully Nonhydrostatic Modeling of Surface Waves — Hengliang Yuan and Chin H. Wu; 132 (4), 447-56 (2006).

Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).

Normal Transmission of S-Wave Across Parallel Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).

Damping in Shear Beam Structures and Estimation of Drift Response — M. Sasani, N. Makris, and B. A. Bolt; 132 (8), 851-8 (2006).

Waves
Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Wave Interaction with a Flexible Porous Breakwater in a Two-Layer Fluid — P. Suresh Kumar and T. Sahoo; 132 (9), 1007-14 (2006).

Antiplane (SH) Waves Diffraction by a Semicircular Cylindrical Hill Revisited: An Improved Analytic Wave Series Solution — Vincent W. Lee, Hao Luo, and Jianwen Liang; 132 (10), 1106-14 (2006).

Webs
Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

White noise
Optimal Vibration Absorber with Nonlinear Viscous Power Law Damping and White Noise Excitation — F. Rüdinger; 132 (1), 46-53 (2006).

Wind
Analytical Study of Turbulent Pollutant Dispersion near a Low Hill — Andy T. Chan, Natalia T. N. Lai, and Pradeep G. Siddheshwar; 132 (1), 99-106 (2006).

Wind gusts
Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).

Wind loads
Revisiting Multimode Coupled Bridge Flutter: Some New Insights — Xinzhong Chen and Ahsan Kareem; 132 (10), 1115-23 (2006).

Wire products
Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Wood
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

Yield
Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97 (2006).

Author Index

Abbas, Hassan H.
Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Abdel-Rohman, M.
Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Abousleiman, Younane
Porochemoelastic Solution for an Inclined Borehole in a Transversely Isotropic Formation — Shailesh Ekbote and Younane Abousleiman; 132 (7), 754-63 (2006).

Ahn, Il-Sang
Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).

Aicher, Simon
Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).

Aldemir, Unal
Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).

Alhan, Cenk
Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).

Ali-Ahmad, Mohamad
Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).

Al Mahmoud, Marwan
Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).

Almutairi, Naif B.
Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).

Al-Qadi, Imad L.
Viscoelastic Modeling and Field Validation of Flexible Pavements — Mostafa A. Elseifi, Imad L. Al-Qadi, and Pyeong Jun Yoo; 132 (2), 172-8 (2006).

Amin, A. F. M. S.
Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Arbocz, Johann
Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).

Ayoub, Ashraf
Nonlinear Analysis of Reinforced Concrete Beam–Columns with Bond-Slip — Ashraf Ayoub; 132 (11), 1177-86 (2006).

Ayuga, F.
Influence of Hopper Eccentricity on Discharge of Cylindrical Mass Flow Silos with Rigid Walls — P. Vidal, A. Couto, F. Ayuga, and M. Guaita; 132 (9), 1026-33 (2006).

Bahuguna, Saurabh
Identification and Modeling of Permanent Deformations of Asphalt Concrete — Saurabh Bahuguna, Vassilis P. Panoskaltsis, and Katerina D. Papoulia; 132 (3), 231-9 (2006).

Bakker, M. C. M.
Shear-Flexural Buckling of Cantilever Columns under Uniformly Distributed Load — M. C. M. Bakker; 132 (11), 1160-7 (2006).

Bandyopadhyay, J. N.
Nonlinear Response of Laminated Cylindrical Shell Panels Subjected to Thermomechanical Loads — Maloy K. Singha, L. S. Ramachandra, and J. N. Bandyopadhyay; 132 (10), 1088-95 (2006).

Bartlett, F. Michael
Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Bažant, Zdeněk P.
Size Effect on Strength of Quasibrittle Structures with Reentrant Corners Symmetrically Loaded in Tension — Zdeněk P. Bažant and Qiang Yu; 132 (11), 1168-76 (2006).

Beck, James L.
Bayesian State Estimation Method for Nonlinear Systems and Its Application to Recorded Seismic Response — Jianye Ching, James L. Beck, Keith A. Porter, and Rustem Shaikhutdinov; 132 (4), 396-410 (2006).

Bennethum, Lynn S.
Compressibility Moduli for Porous Materials Incorporating Volume Fraction — Lynn S. Bennethum; 132 (11), 1205-14 (2006).

Bernal, Dionisio
Flexibility-Based Damage Localization from Stochastic Realization Results — Dionisio Bernal; 132 (6), 651-8 (2006).

Berryman, James G.
Effective Medium Theories for Multicomponent Poroelastic Composites — James G. Berryman; 132 (5), 519-31 (2006).

Bhuiyan, A. R.
Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Biswas, G.
Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).
Erratum for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (6), 704 (2006).
Errata for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (7), 793 (2006).

Bolt, B. A.
Damping in Shear Beam Structures and Estimation of Drift Response — M. Sasani, N. Makris, and B. A. Bolt; 132 (8), 851-8 (2006).

Bolzon, Gabriella
Fracture Mechanics Based Model for Joints under Cyclic Loading — Eric Puntel, Gabriella Bolzon, and Victor E. Saouma; 132 (11), 1151-9 (2006).

Bonfield, Peter
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).

Bonnet, G.
Analyses of Heated Concrete Spalling due to Restrained Thermal Dilation: Application to the "Chunnel" Fire — Y. Msaad and G. Bonnet; 132 (10), 1124-32 (2006).

Bradford, Scott F.
Impact of Limiters on Accuracy of High-Resolution Flow and Transport Models — Brett F. Sanders and Scott F. Bradford; 132 (1), 87-98 (2006).

Bu, J. Q.
Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).
Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).

Buttlar, William G.
Application of Graded Finite Elements for Asphalt Pavements — William G. Buttlar, Glaucio H. Paulino, and Seong Hyeok Song; 132 (3), 240-9 (2006).
Simulation of Crack Propagation in Asphalt Concrete Using an Intrinsic Cohesive Zone Model — Seong Hyeok Song, Glaucio H. Paulino, and William G. Buttlar; 132 (11), 1215-23 (2006).

Cai, J. G.
Normal Transmission of S-Wave Across Parallel Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).
Cao, Maosen
Nondestructive Assessment of Reinforced Concrete Structures Based on Fractal Damage Characteristic Factors — Maosen Cao, Qingwen Ren, and Pizhong Qiao; 132 (9), 924-31 (2006).
Cardou, Alain
Discussion of "Bending Behavior of Helically Wrapped Cables" by Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman — Alain Cardou; 132 (7), 790-1 (2006).
Challamel, Noël
On the Comparison of Timoshenko and Shear Models in Beam Dynamics — Noël Challamel; 132 (10), 1141-5 (2006).
Chan, Andy T.
Analytical Study of Turbulent Pollutant Dispersion near a Low Hill — Andy T. Chan, Natalia T. N. Lai, and Pradeep G. Siddheshwar; 132 (1), 99-106 (2006).
Chan, S. L.
Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).
Chang, Chang-Ching
Optimal H_∞ Output Feedback Control Systems with Time Delay — Chi-Chang Lin, Chang-Ching Chang, and Huang-Lin Chen; 132 (10), 1096-105 (2006).
Chang, Kuang-An
Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).
Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).
Chang, Shuenn-Yih
Accurate Representation of External Force in Time History Analysis — Shuenn-Yih Chang; 132 (1), 34-45 (2006).
Chang, Sung-Chieh
Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).
Chaudhuri, Reaz A.
Postbuckling of Moderately Thick Imperfect Rings under External Pressure — Deokjoo Kim and Reaz A. Chaudhuri; 132 (11), 1273-6 (2006).
Chen, C. M.
Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).
Chen, Huang-Lin
Optimal H_∞ Output Feedback Control Systems with Time Delay — Chi-Chang Lin, Chang-Ching Chang, and Huang-Lin Chen; 132 (10), 1096-105 (2006).
Chen, Qin
Fully Nonlinear Boussinesq-Type Equations for Waves and Currents over Porous Beds — Qin Chen; 132 (2), 220-30 (2006).
Chen, Stuart S.
Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).
Chen, Su Huan
Dynamic Response of Closed-Loop System with Uncertain Parameters Using Interval Finite-Element Method — Su Huan Chen and Xiao Ming Zhang; 132 (8), 830-40 (2006).
Chen, Xinzhong
Revisiting Multimode Coupled Bridge Flutter: Some New Insights — Xinzhong Chen and Ahsan Kareem; 132 (10), 1115-23 (2006).
Cheng, J. J. R.
Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).
Cheol Choi, Young
Theoretical Analysis of Transfer Lengths in Pretensioned Prestressed Concrete Members — Byung Hwan Oh, Eui Sung Kim, and Young Cheol Choi; 132 (10), 1057-66 (2006).
Cheung, Sai Hung
Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).
Ching, Jianye
Bayesian State Estimation Method for Nonlinear Systems and Its Application to Recorded Seismic Response — Jianye Ching, James L. Beck, Keith A. Porter, and Rustem Shaikhutdinov; 132 (4), 396-410 (2006).
Cho, Sang-Won
Modified Sturm Sequence Property for Damped Systems — Ji-Seong Jo, Man-Gi Ko, Sang-Won Cho, and In-Won Lee; 132 (7), 785-9 (2006).
Christenson, Richard E.
Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer Jr., and Erik A. Johnson; 132 (3), 268-78 (2006).
Chua, Lloyd H. C.
Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).
Chucheepsakul, S.
Postbuckling of Beam Subjected to Intermediate Follower Force — B. Phungpaingam, S. Chucheepsakul, and C. M. Wang; 132 (1), 16-25 (2006).
Couto, A.
Influence of Hopper Eccentricity on Discharge of Cylindrical Mass Flow Silos with Rigid Walls — P. Vidal, A. Couto, F. Ayuga, and M. Guaita; 132 (9), 1026-33 (2006).
Dai, H.
Dynamic Behavior of Nonlinear Cable System. IV — H. Dai and D. A. Gasparini; 132 (3), 287-94 (2006).
Dargush, Gary F.
Dynamic Ratcheting in Elastoplastic Single-Degree-of-Freedom Systems — Il-Sang Ahn, Stuart S. Chen, and Gary F. Dargush; 132 (4), 411-21 (2006).
Davister, M. D.
The Most Degrading Postbuckling Mode of Pin-Jointed Structures — M. D. Davister; 132 (7), 775-9 (2006).
Deodatis, George
Simulation of Multidimensional Binary Random Fields with Application to Modeling of Two-Phase Random Media — Phaedon S. Koutsourelakis and George Deodatis; 132 (6), 619-31 (2006).
de Oliveira e Sousa, José Luiz Antunes
Determining the Tensile Stress-Crack Opening Curve of Concrete by Inverse Analysis — José Luiz Antunes de Oliveira e Sousa and Ravindra Gettu; 132 (2), 141-8 (2006).
Der Kiureghian, Armen
Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).
Optimal Design with Probabilistic Objective and Constraints — Johannes O. Royset, Armen Der Kiureghian, and Elijah Polak; 132 (1), 107-18 (2006).
Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).
Closure to "Bending Behavior of Helically Wrapped Cables" by Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman — Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman; 132 (7), 792 (2006).
De Silva, I. P. D.
Turbulence Dissipation in Stirred Jars — I. P. D. De Silva; 132 (11), 1260-8 (2006).
Dessouky, Samer
Finite-Element Analysis of Hot Mix Asphalt Microstructure Using Effective Local Material Properties and Strain Gradient Elasticity — Samer Dessouky, Eyad Masad, Dallas Little, and Hussein Zbib; 132 (2), 158-71 (2006).
Dillard, David A.
Postbuckling of Elastic Columns with Second-Mode Imperfection — Raymond H. Plaut, David A. Dillard, and Lawrence N. Virgin; 132 (8), 898-901 (2006).
Dimentberg, M.
Short-Term Structural Instability under Random Dynamic Loads — M. Dimentberg, D. Iourtchenko, and A. Naess; 132 (11), 1269-72 (2006).
Dinwoodie, John
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).
Dodds, Robert H., Jr.
Computation of Mixed-Mode Stress Intensity Factors for Cracks in Three-Dimensional Functionally Graded Solids — Matthew C. Walters, Glaucio H. Paulino, and Robert H. Dodds Jr.; 132 (1), 1-15 (2006).
Dogruer, O. Y.
Exact Solution of Out-of-Plane Problems of an Arch with Varying Curvature and Cross Section — E. Tufekci and O. Y. Dogruer; 132 (6), 600-9 (2006).
Driver, Robert G.
Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).

Ekbote, Shailesh
Porochemoelastic Solution for an Inclined Borehole in a Transversely Isotropic Formation — Shailesh Ekbote and Younane Abousleiman; 132 (7), 754-63 (2006).
Elseifi, Mostafa A.
Viscoelastic Modeling and Field Validation of Flexible Pavements — Mostafa A. Elseifi, Imad L. Al-Qadi, and Pyeong Jun Yoo; 132 (2), 172-8 (2006).
Enjily, Vahik
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).
Eskandari-Ghadi, Morteza
Damage Theory Based on Composite Mechanics — Yunping Xi, Morteza Eskandari-Ghadi, Suwito, and Stein Sture; 132 (11), 1195-204 (2006).
Fan, Mizi
Effect of Test Piece Size on Rheological Behavior of Wood Composites — Mizi Fan, Peter Bonfield, John Dinwoodie, and Vahik Enjily; 132 (8), 815-22 (2006).
Fox, Patrick J.
Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).
Franchin, Paolo
Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).
Fujino, Yozo
Auto-Parametric Vibration of a Cable-Stayed-Beam Structure under Random Excitation — Yong Xia and Yozo Fujino; 132 (3), 279-86 (2006).
Ganapathi, M.
Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).
Gasparini, D. A.
Dynamic Behavior of Nonlinear Cable System. IV — H. Dai and D. A. Gasparini; 132 (3), 287-94 (2006).
Gavin, Henri P.
Optimal Control: Basis for Performance Comparison of Passive and Semiactive Isolation Systems — Cenk Alhan, Henri P. Gavin, and Unal Aldemir; 132 (7), 705-13 (2006).
Gettu, Ravindra
Determining the Tensile Stress-Crack Opening Curve of Concrete by Inverse Analysis — José Luiz Antunes de Oliveira e Sousa and Ravindra Gettu; 132 (2), 141-8 (2006).
Ghaemian, Mohsen
Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).
Ghassemi, A.
Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).
Ghosn, Michel
Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).
Girish, J.
Thermomechanical Postbuckling Analysis of Cross-Ply Laminated Cylindrical Shell Panels — J. Girish and L. S. Ramachandra; 132 (2), 133-40 (2006).
Gjelsvik, Atle
Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and Atle Gjelsvik; 132 (6), 594-9 (2006).
Goldfeld, Yiska
Elastic Buckling of Laminated Conical Shells Using a Hierarchical High-Fidelity Analysis Procedure — Yiska Goldfeld and Johann Arbocz; 132 (12), 1335-44 (2006).
Grigoriu, Mircea
Evaluation of Karhunen–Loève, Spectral, and Sampling Representations for Stochastic Processes — Mircea Grigoriu; 132 (2), 179-89 (2006).
Galerkin Solution for Linear Stochastic Algebraic Equations — Mircea Grigoriu; 132 (12), 1277-89 (2006).
Gu, Chao
Buckling of Simply Supported Rectangular Reissner–Mindlin Plates Subjected to Linearly Varying In-Plane Loading — Hongzhi Zhong and Chao Gu; 132 (5), 578-81 (2006).
Guaita, M.
Influence of Hopper Eccentricity on Discharge of Cylindrical Mass Flow Silos with Rigid Walls — P. Vidal, A. Couto, F. Ayuga, and M. Guaita; 132 (9), 1026-33 (2006).
Guo, W. H.
Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).
Haj-Ali, Rami
Multiscale Nonlinear Framework for the Long-Term Behavior of Layered Composite Structures — Rami Haj-Ali and Anastasia H. Muliana; 132 (12), 1354-62 (2006).
Hall, John F.
Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).
Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).
Hassan, M. F.
Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).
Hefny, A. M.
Normal Transmission of S-Wave Across Parallel Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).
Ho, Tsung-Chun
Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).
Hong, Kee-Jeung
Closure to "Bending Behavior of Helically Wrapped Cables" by Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman — Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman; 132 (7), 792 (2006).
Hou, Chao-Sheng
Axisymmetric Nonlinear Stability of a Shallow Conical Shell with a Spherical Cap of Arbitrary Variable Shell Thickness — Chao-Sheng Hou, Yue Yin, and Cheng-Bo Wang; 132 (10), 1146-9 (2006).
Hrudey, T. M.
Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).
Hsu, Tung-Wen
Behavior of One-Dimensional Consolidation under Time-Dependent Loading — Tung-Wen Hsu and Shuan-Chai Lu; 132 (4), 457-62 (2006).
Hu, S.-L. James
Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).
Hu, Sau-Lon James
Cross-Modal Strain Energy Method for Estimating Damage Severity — Sau-Lon James Hu, Shuqing Wang, and Huajun Li; 132 (4), 429-37 (2006).
Huang, Ching-Tung
Equivalent Linearization for the Nonstationary Response Analysis of Nonlinear Systems with Random Parameters — Ching-Tung Huang and Wilfred D. Iwan; 132 (5), 465-74 (2006).
Huang, Jin H.
Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).
Iourtchenko, D.
Short-Term Structural Instability under Random Dynamic Loads — M. Dimentberg, D. Iourtchenko, and A. Naess; 132 (11), 1269-72 (2006).
Iwan, Wilfred D.
Equivalent Linearization for the Nonstationary Response Analysis of Nonlinear Systems with Random Parameters — Ching-Tung Huang and Wilfred D. Iwan; 132 (5), 465-74 (2006).
Optimal Nonlocal and Asymmetric Structural Damping Using Regenerative Force Actuation Networks — J. T. Scruggs and W. D. Iwan; 132 (9), 932-40 (2006).
Jabareen, Mahmood
Postbuckling Analysis of Geometrically Imperfect Conical Shells — Mahmood Jabareen and Izhak Sheinman; 132 (12), 1326-34 (2006).
Ji, Shunying
Effect of Contact Force Models on Granular Flow Dynamics — Shunying Ji and Hayley H. Shen; 132 (11), 1252-9 (2006).
Jo, Hyo Jae
Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).
Jo, Ji-Seong
Modified Sturm Sequence Property for Damped Systems — Ji-Seong Jo, Man-Gi Ko, Sang-Won Cho, and In-Won Lee; 132 (7), 785-9 (2006).

Johnson, Erik A.
Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer Jr., and Erik A. Johnson; 132 (3), 268-78 (2006).
Jung, Kwang Hyo
Viscous Effect on the Roll Motion of a Rectangular Structure — Kwang Hyo Jung, Kuang-An Chang, and Hyo Jae Jo; 132 (2), 190-200 (2006).
Kam, T. Y.
System Identification of Partially Restrained Composite Plates Using Measured Natural Frequencies — C. R. Lee and T. Y. Kam; 132 (8), 841-50 (2006).
Elastic Constants Identification of Composite Materials Using Single Angle-Ply Laminate — C. M. Chen and T. Y. Kam; 132 (11), 1187-94 (2006).
Kamali, Mohammad T.
Three-Dimensional Free Vibration Analysis of Multiphase Piezocomposite Structures — Mohammad T. Kamali and Hossein M. Shodja; 132 (8), 871-81 (2006).
Kareem, Ahsan
Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).
Revisiting Multimode Coupled Bridge Flutter: Some New Insights — Xinzhong Chen and Ahsan Kareem; 132 (10), 1115-23 (2006).
Karunarathna, S. A. S. A.
Turbulent Boundary Layer Flows Above a Porous Surface Subject to Flow Injection — Pengzhi Lin and S. A. S. A. Karunarathna; 132 (10), 1133-40 (2006).
Katafygiotis, Lambros
Domain Decomposition Method for Calculating the Failure Probability of Linear Dynamic Systems Subjected to Gaussian Stochastic Loads — Lambros Katafygiotis and Sai Hung Cheung; 132 (5), 475-86 (2006).
Kaushal, D. R.
Discussion of "Fluid-Solid Interaction in Particle-Laden Flows" by Q. Q. Liu and V. P. Singh — D. R. Kaushal; 132 (4), 463-4 (2006).
Kenis, William
Stochastic Spatial Excitation Induced by a Distributed Contact on Homogenous Gaussian Random Fields — Lu Sun, William Kenis, and Weijun Wang; 132 (7), 714-22 (2006).
Khoo, H. A.
Microvoid Damage Model with Material Dilation for Ductile Fracture — H. A. Khoo, T. M. Hrudey, and J. J. R. Cheng; 132 (10), 1067-76 (2006).
Kijewski-Correa, T.
Efficacy of Hilbert and Wavelet Transforms for Time-Frequency Analysis — T. Kijewski-Correa and A. Kareem; 132 (10), 1037-49 (2006).
Kim, Deokjoo
Postbuckling of Moderately Thick Imperfect Rings under External Pressure — Deokjoo Kim and Reaz A. Chaudhuri; 132 (11), 1273-6 (2006).
Kim, Moon-Young
Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).
Kim, Nam-Il
Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).
Kim, Sung-Bo
Spatial Stability of Shear Deformable Nonsymmetric Thin-Walled Curved Beams: A Centroid-Shear Center Formulation — Moon-Young Kim, Nam-Il Kim, and Sung-Bo Kim; 132 (12), 1313-25 (2006).
Kishen, J. M. Chandra
Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).
Klenke, Marcus
Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).
Klöck, Wolfgang
Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).
Kmet, Stanislav
Nonlinear Analytical Solution for Cable Truss — Stanislav Kmet and Zuzana Kokorudova; 132 (1), 119-23 (2006).
Ko, Man-Gi
Modified Sturm Sequence Property for Damped Systems — Ji-Seong Jo, Man-Gi Ko, Sang-Won Cho, and In-Won Lee; 132 (7), 785-9 (2006).
Kokorudova, Zuzana
Nonlinear Analytical Solution for Cable Truss — Stanislav Kmet and Zuzana Kokorudova; 132 (1), 119-23 (2006).
Koutsourelakis, Phaedon S.
Simulation of Multidimensional Binary Random Fields with Application to Modeling of Two-Phase Random Media — Phaedon S. Koutsourelakis and George Deodatis; 132 (6), 619-31 (2006).
Krishnan, J. Murali
Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).
Krishnan, Swaminathan
Modeling Steel Frame Buildings in Three Dimensions. I: Panel Zone and Plastic Hinge Beam Elements — Swaminathan Krishnan and John F. Hall; 132 (4), 345-58 (2006).
Modeling Steel Frame Buildings in Three Dimensions. II: Elastofiber Beam Element and Examples — Swaminathan Krishnan and John F. Hall; 132 (4), 359-74 (2006).
Kumar, P. Suresh
Wave Interaction with a Flexible Porous Breakwater in a Two-Layer Fluid — P. Suresh Kumar and T. Sahoo; 132 (9), 1007-14 (2006).
Lai, Natalia T. N.
Analytical Study of Turbulent Pollutant Dispersion near a Low Hill — Andy T. Chan, Natalia T. N. Lai, and Pradeep G. Siddheshwar; 132 (1), 99-106 (2006).
Lancelot, Laurent
Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).
Landis, Eric N.
Toward a Physical Damage Variable for Concrete — Eric N. Landis; 132 (7), 771-4 (2006).
Law, S. S.
Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).
Force Identification Based on Sensitivity in Time Domain — Z. R. Lu and S. S. Law; 132 (10), 1050-6 (2006).
Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).
Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).
Lechman, Jeremy
Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).
Lee, C. R.
System Identification of Partially Restrained Composite Plates Using Measured Natural Frequencies — C. R. Lee and T. Y. Kam; 132 (8), 841-50 (2006).
Lee, In-Won
Modified Sturm Sequence Property for Damped Systems — Ji-Seong Jo, Man-Gi Ko, Sang-Won Cho, and In-Won Lee; 132 (7), 785-9 (2006).
Lee, Jong Seh
Dynamic Stability of Ferromagnetic Beam-Plates with Magnetoelastic Interaction and Magnetic Damping in Transverse Magnetic Fields — Xingzhe Wang and Jong Seh Lee; 132 (4), 422-8 (2006).
Lee, Vincent W.
Antiplane (SH) Waves Diffraction by a Semicircular Cylindrical Hill Revisited: An Improved Analytic Wave Series Solution — Vincent W. Lee, Hao Luo, and Jianwen Liang; 132 (10), 1106-14 (2006).
Leukart, Michael
Identification and Interpretation of Microplane Material Laws — Michael Leukart and Ekkehard Ramm; 132 (3), 295-305 (2006).
Leung, Christopher K. Y.
Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).
Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).
Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).
Li, Huajun
Cross-Modal Strain Energy Method for Estimating Damage Severity — Sau-Lon James Hu, Shuqing Wang, and Huajun Li; 132 (4), 429-37 (2006).
Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures —

Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

Li, Qingming

Numerical Simulations of Dynamic Instability of Elastic-Plastic Beams — Guowei Ma, Yumin Liu, and Qingming Li; 132 (3), 260-7 (2006).

Li, X. Y.

Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

Li, Zongjin

Upsetting Tests of Fresh Cementitious Composites for Extrusion — Xiangming Zhou and Zongjin Li; 132 (2), 149-57 (2006).

Liang, Jianwen

Antiplane (SH) Waves Diffraction by a Semicircular Cylindrical Hill Revisited: An Improved Analytic Wave Series Solution — Vincent W. Lee, Hao Luo, and Jianwen Liang; 132 (10), 1106-14 (2006).

Lin, Chang

Laboratory Observation of Solitary Wave Propagating over a Submerged Rectangular Dike — Chang Lin, Sung-Chieh Chang, Tsung-Chun Ho, and Kuang-An Chang; 132 (5), 545-54 (2006).

Lin, Chi-Chang

Optimal H_∞ Output Feedback Control Systems with Time Delay — Chi-Chang Lin, Chang-Ching Chang, and Huang-Lin Chen; 132 (10), 1096-105 (2006).

Lin, Han

Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Lin, Huan

Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Lin, Pengzhi

Turbulent Boundary Layer Flows Above a Porous Surface Subject to Flow Injection — Pengzhi Lin and S. A. S. A. Karunarathna; 132 (10), 1133-40 (2006).

Ling, Hoe I.

Unified Sand Model Based on the Critical State and Generalized Plasticity — Hoe I. Ling and Songtao Yang; 132 (12), 1380-91 (2006).

Little, D. N.

Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).

Finite-Element Analysis of Hot Mix Asphalt Microstructure Using Effective Local Material Properties and Strain Gradient Elasticity — Samer Dessouky, Eyad Masad, Dallas Little, and Hussein Zbib; 132 (2), 158-71 (2006).

Liu, Q. Q.

Closure to "Fluid-Solid Interaction in Particle-Laden Flows" by Q. Q. Liu and V. P. Singh — Q. Q. Liu and V. P. Singh; 132 (4), 464 (2006).

Liu, Yu-Cheng

Electroelastic Response of a Laminated Composite Plate with Piezoelectric Sensors and Actuators — Jin H. Huang and Yu-Cheng Liu; 132 (8), 889-97 (2006).

Liu, Yumin

Numerical Simulations of Dynamic Instability of Elastic-Plastic Beams — Guowei Ma, Yumin Liu, and Qingming Li; 132 (3), 260-7 (2006).

Lo, D. C.

Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Lu, Ning

Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).

Lu, Shuan-Chai

Behavior of One-Dimensional Consolidation under Time-Dependent Loading — Tung-Wen Hsu and Shuan-Chai Lu; 132 (4), 457-62 (2006).

Lu, Z. R.

Force Identification Based on Sensitivity in Time Domain — Z. R. Lu and S. S. Law; 132 (10), 1050-6 (2006).

Structural Damage Detection from Wavelet Coefficient Sensitivity with Model Errors — S. S. Law, X. Y. Li, and Z. R. Lu; 132 (10), 1077-87 (2006).

Luk, Herman C. Y.

Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Luo, Hao

Antiplane (SH) Waves Diffraction by a Semicircular Cylindrical Hill Revisited: An Improved Analytic Wave Series Solution — Vincent W. Lee, Hao Luo, and Jianwen Liang; 132 (10), 1106-14 (2006).

Lupoi, Alessio

Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Lupoi, Giorgio

Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Ma, Guowei

Numerical Simulations of Dynamic Instability of Elastic-Plastic Beams — Guowei Ma, Yumin Liu, and Qingming Li; 132 (3), 260-7 (2006).

MacDougall, Colin

Mechanical Model for Unbonded Seven-Wire Tendon with Single Broken Wire — Colin MacDougall and F. Michael Bartlett; 132 (12), 1345-53 (2006).

Makris, N.

Damping in Shear Beam Structures and Estimation of Drift Response — M. Sasani, N. Makris, and B. A. Bolt; 132 (8), 851-8 (2006).

Masad, Eyad

Finite-Element Analysis of Hot Mix Asphalt Microstructure Using Effective Local Material Properties and Strain Gradient Elasticity — Samer Dessouky, Eyad Masad, Dallas Little, and Hussein Zbib; 132 (2), 158-71 (2006).

Masud, Arif

New Stabilized Finite Element Method Embedded with a Cap Model for the Analysis of Granular Materials — Kaiming Xia and Arif Masud; 132 (3), 250-9 (2006).

Modares, Mehdi

Natural Frequencies of a Structure with Bounded Uncertainty — Mehdi Modares, Robert L. Mullen, and Rafi L. Muhanna; 132 (12), 1363-71 (2006).

Msaad, Y.

Analyses of Heated Concrete Spalling due to Restrained Thermal Dilation: Application to the "Chunnel" Fire — Y. Msaad and G. Bonnet; 132 (10), 1124-32 (2006).

Muhanna, Rafi L.

Natural Frequencies of a Structure with Bounded Uncertainty — Mehdi Modares, Robert L. Mullen, and Rafi L. Muhanna; 132 (12), 1363-71 (2006).

Muliana, Anastasia H.

Multiscale Nonlinear Framework for the Long-Term Behavior of Layered Composite Structures — Rami Haj-Ali and Anastasia H. Muliana; 132 (12), 1354-62 (2006).

Mullen, Robert L.

Natural Frequencies of a Structure with Bounded Uncertainty — Mehdi Modares, Robert L. Mullen, and Rafi L. Muhanna; 132 (12), 1363-71 (2006).

Naess, A.

Short-Term Structural Instability under Random Dynamic Loads — M. Dimentberg, D. Iourtchenko, and A. Naess; 132 (11), 1269-72 (2006).

Ng, Tang-Tat

Input Parameters of Discrete Element Methods — Tang-Tat Ng; 132 (7), 723-9 (2006).

Oh, Byung Hwan

Theoretical Analysis of Transfer Lengths in Pretensioned Prestressed Concrete Members — Byung Hwan Oh, Eui Sung Kim, and Young Cheol Choi; 132 (10), 1057-66 (2006).

Okui, Y.

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Pandey, P. C.

Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97 (2006).

Panoskaltsis, Vassilis P.

Identification and Modeling of Permanent Deformations of Asphalt Concrete — Saurabh Bahuguna, Vassilis P. Panoskaltsis, and Katerina D. Papoulia; 132 (3), 231-9 (2006).

Paolucci, Roberto

Ground Motion Induced by Train Passage — Roberto Paolucci and Davide Spinelli; 132 (2), 201-10 (2006).

Papailiou, Konstantin O.

Discussion of "Bending Behavior of Helically Wrapped Cables" by Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman — Konstantin O. Papailiou; 132 (7), 791 (2006).

Papoulia, Katerina D.

Identification and Modeling of Permanent Defor-

mations of Asphalt Concrete — Saurabh Bahuguna, Vassilis P. Panoskaltsis, and Katerina D. Papoulia; 132 (3), 231-9 (2006).

Parihar, A. S.

Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Erratum for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (6), 704 (2006).

Errata for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (7), 793 (2006).

Paulino, Glaucio H.

Computation of Mixed-Mode Stress Intensity Factors for Cracks in Three-Dimensional Functionally Graded Solids — Matthew C. Walters, Glaucio H. Paulino, and Robert H. Dodds Jr.; 132 (1), 1-15 (2006).

Application of Graded Finite Elements for Asphalt Pavements — William G. Buttlar, Glaucio H. Paulino, and Seong Hyeok Song; 132 (3), 240-9 (2006).

Simulation of Crack Propagation in Asphalt Concrete Using an Intrinsic Cohesive Zone Model — Seong Hyeok Song, Glaucio H. Paulino, and William G. Buttlar; 132 (11), 1215-23 (2006).

Pei, Jin-Song

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. I: Formulation — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1290-300 (2006).

New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. II: Applications — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1301-12 (2006).

Pekau, O. A.

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).

Penumadu, Dayakar

Strain Localization in Combined Axial-Torsional Testing on Kaolin Clay — Han Lin and Dayakar Penumadu; 132 (5), 555-64 (2006).

Phohomsiri, Phailaung

Time-Delayed Positive Velocity Feedback Control Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Phungpaingam, B.

Postbuckling of Beam Subjected to Intermediate Follower Force — B. Phungpaingam, S. Chucheepsakul, and C. M. Wang; 132 (1), 16-25 (2006).

Pinto, Federico

Three-Dimensional Indirect Boundary Element Method Formulation for Dynamic Analysis of Frames Buried in Semiinfinite Elastic Media — Federico Pinto and Carlos A. Prato; 132 (9), 967-78 (2006).

Pinto, Paolo E.

Seismic Fragility Analysis of Structural Systems — Giorgio Lupoi, Paolo Franchin, Alessio Lupoi, and Paolo E. Pinto; 132 (4), 385-95 (2006).

Plaut, Raymond H.

Postbuckling of Elastic Columns with Second-Mode Imperfection — Raymond H. Plaut, David A. Dillard, and Lawrence N. Virgin; 132 (8), 898-901 (2006).

Polak, Elijah

Optimal Design with Probabilistic Objective and Constraints — Johannes O. Royset, Armen Der Kiureghian, and Elijah Polak; 132 (1), 107-18 (2006).

Porporato, Amilcare

Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Porter, Keith A.

Bayesian State Estimation Method for Nonlinear Systems and Its Application to Recorded Seismic Response — Jianye Ching, James L. Beck, Keith A. Porter, and Rustem Shaikhutdinov; 132 (4), 396-410 (2006).

Prakash, T.

Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).

Prato, Carlos A.

Three-Dimensional Indirect Boundary Element Method Formulation for Dynamic Analysis of Frames Buried in Semiinfinite Elastic Media — Federico Pinto and Carlos A. Prato; 132 (9), 967-78 (2006).

Puntel, Eric

Fracture Mechanics Based Model for Joints under Cyclic Loading — Eric Puntel, Gabriella Bolzon, and Victor E. Saouma; 132 (11), 1151-9 (2006).

Qiao, Pizhong

Fracture Analysis of Shear Deformable Bi-Material Interface — Jialai Wang and Pizhong Qiao; 132 (3), 306-16 (2006).

Nondestructive Assessment of Reinforced Concrete Structures Based on Fractal Damage Characteristic Factors — Maosen Cao, Qingwen Ren, and Pizhong Qiao; 132 (9), 924-31 (2006).

Qiu, Tong

Hydraulic Damping of Saturated Poroelastic Soils During Steady-State Vibration — Tong Qiu and Patrick J. Fox; 132 (8), 859-70 (2006).

Qiu, Xiangjun

Full Two-Dimensional Model for Rolling Resistance: Hard Cylinder on Viscoelastic Foundation of Finite Thickness — Xiangjun Qiu; 132 (11), 1241-51 (2006).

Rajagopal, K. R.

Rate-Type Model for Bituminous Mixtures and Its Application to Sand Asphalt — J. Murali Krishnan, K. R. Rajagopal, and D. N. Little; 132 (6), 632-40 (2006).

Ramachandra, L. S.

Thermomechanical Postbuckling Analysis of Cross-Ply Laminated Cylindrical Shell Panels — J. Girish and L. S. Ramachandra; 132 (2), 133-40 (2006).

Nonlinear Response of Laminated Cylindrical Shell Panels Subjected to Thermomechanical Loads — Maloy K. Singha, L. S. Ramachandra, and J. N. Bandyopadhyay; 132 (10), 1088-95 (2006).

Ramm, Ekkehard

Identification and Interpretation of Microplane Material Laws — Michael Leukart and Ekkehard Ramm; 132 (3), 295-305 (2006).

Ranjan, R.

Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).

Erratum for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (6), 704 (2006).

Errata for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (7), 793 (2006).

Reinhardt, Hans-Wolf

Fracture Toughness of Wood Fiber Gypsum Panels from Size Effect Law — Simon Aicher, Wolfgang Klöck, and Hans-Wolf Reinhardt; 132 (7), 730-8 (2006).

Reinhorn, Andrei M.

Lagrangian Approach to Structural Collapse Simulation — Mettupalayam V. Sivaselvan and Andrei M. Reinhorn; 132 (8), 795-805 (2006).

Ren, Qingwen

Nondestructive Assessment of Reinforced Concrete Structures Based on Fractal Damage Characteristic Factors — Maosen Cao, Qingwen Ren, and Pizhong Qiao; 132 (9), 924-31 (2006).

Revelli, Roberto

Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Ridolfi, Luca

Green's Function of the Linearized de Saint-Venant Equations — Luca Ridolfi, Amilcare Porporato, and Roberto Revelli; 132 (2), 125-32 (2006).

Roumi, Farshid

Effective Moduli of Coated Particulate Composites with BCC Structure at High Concentration — Hossein M. Shodja and Farshid Roumi; 132 (8), 882-8 (2006).

Royset, Johannes O.

Optimal Design with Probabilistic Objective and Constraints — Johannes O. Royset, Armen Der Kiureghian, and Elijah Polak; 132 (1), 107-18 (2006).

Rüdinger, F.

Optimal Vibration Absorber with Nonlinear Viscous Power Law Damping and White Noise Excitation — F. Rüdinger; 132 (1), 46-53 (2006).

Sackman, Jerome L.

Closure to "Bending Behavior of Helically Wrapped Cables" by Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman — Kee-Jeung Hong, Armen Der Kiureghian, and Jerome L. Sackman; 132 (7), 792 (2006).

Sahoo, T.

Wave Interaction with a Flexible Porous Breakwater in a Two-Layer Fluid — P. Suresh Kumar and T. Sahoo; 132 (9), 1007-14 (2006).

Sain, Trisha

Damage Assessment in Beams Using Inverse Method — Trisha Sain and J. M. Chandra Kishen; 132 (4), 337-44 (2006).

Sanders, Brett F.
Impact of Limiters on Accuracy of High-Resolution Flow and Transport Models — Brett F. Sanders and Scott F. Bradford; 132 (1), 87-98 (2006).
Saouma, Victor E.
Fracture Mechanics Based Model for Joints under Cyclic Loading — Eric Puntel, Gabriella Bolzon, and Victor E. Saouma; 132 (11), 1151-9 (2006).
Sasani, M.
Damping in Shear Beam Structures and Estimation of Drift Response — M. Sasani, N. Makris, and B. A. Bolt; 132 (8), 851-8 (2006).
Sause, Richard
Behavior of Corrugated Web I-Girders under In-Plane Loads — Hassan H. Abbas, Richard Sause, and Robert G. Driver; 132 (8), 806-14 (2006).
Sawada, Sumio
Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).
Scruggs, J. T.
Optimal Nonlocal and Asymmetric Structural Damping Using Regenerative Force Actuation Networks — J. T. Scruggs and W. D. Iwan; 132 (9), 932-40 (2006).
Segal, Fred
Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).
Sen, Tapan K.
Probability of Fatigue Failure in Steel Catenary Risers in Deep Water — Tapan K. Sen; 132 (9), 1001-6 (2006).
Seyyedian, Hamid
Effect of Internal Moment Release on the Eigenfrequencies of Combined Linear Systems — Hamid Seyyedian; 132 (8), 823-9 (2006).
Shahrour, Isam
Failure and Dilatancy Properties of Sand at Relatively Low Stresses — Laurent Lancelot, Isam Shahrour, and Marwan Al Mahmoud; 132 (12), 1396-9 (2006).
Shaikhutdinov, Rustem
Bayesian State Estimation Method for Nonlinear Systems and Its Application to Recorded Seismic Response — Jianye Ching, James L. Beck, Keith A. Porter, and Rustem Shaikhutdinov; 132 (4), 396-410 (2006).
Sheibany, Farrokh
Effects of Environmental Action on Thermal Stress Analysis of Karaj Concrete Arch Dam — Farrokh Sheibany and Mohsen Ghaemian; 132 (5), 532-44 (2006).
Sheinman, Izhak
Postbuckling Analysis of Geometrically Imperfect Conical Shells — Mahmood Jabareen and Izhak Sheinman; 132 (12), 1326-34 (2006).
Shen, Hayley H.
Effect of Contact Force Models on Granular Flow Dynamics — Shunying Ji and Hayley H. Shen; 132 (11), 1252-9 (2006).
Shodja, Hossein M.
Three-Dimensional Free Vibration Analysis of Multiphase Piezocomposite Structures — Mohammad T. Kamali and Hossein M. Shodja; 132 (8), 871-81 (2006).
Effective Moduli of Coated Particulate Composites with BCC Structure at High Concentration — Hossein M. Shodja and Farshid Roumi; 132 (8), 882-8 (2006).
Shuy, E. B.
Coupling of U-Tube and Shear Layer Oscillations in an Interconnected Flow Compartment — Lloyd H. C. Chua and E. B. Shuy; 132 (7), 764-70 (2006).
Siddheshwar, Pradeep G.
Analytical Study of Turbulent Pollutant Dispersion near a Low Hill — Andy T. Chan, Natalia T. N. Lai, and Pradeep G. Siddheshwar; 132 (1), 99-106 (2006).
Singh, V. P.
Closure to "Fluid-Solid Interaction in Particle-Laden Flows" by Q. Q. Liu and V. P. Singh — Q. Q. Liu and V. P. Singh; 132 (4), 464 (2006).
Singha, Maloy K.
Nonlinear Response of Laminated Cylindrical Shell Panels Subjected to Thermomechanical Loads — Maloy K. Singha, L. S. Ramachandra, and J. N. Bandyopadhyay; 132 (10), 1088-95 (2006).
Sivaselvan, Mettupalayam V.
Lagrangian Approach to Structural Collapse Simulation — Mettupalayam V. Sivaselvan and Andrei M. Reinhorn; 132 (8), 795-805 (2006).
Smyth, Andrew W.
Energy Capacity Criterion for the Design of Columns against Collapse — Andrew W. Smyth and Atle Gjelsvik; 132 (6), 594-9 (2006).
New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. I: Formulation — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1290-300 (2006).
New Approach to Designing Multilayer Feedforward Neural Network Architecture for Modeling Nonlinear Restoring Forces. II: Applications — Jin-Song Pei and Andrew W. Smyth; 132 (12), 1301-12 (2006).
Song, Junho
Joint First-Passage Probability and Reliability of Systems under Stochastic Excitation — Junho Song and Armen Der Kiureghian; 132 (1), 65-77 (2006).
Generalized Bouc–Wen Model for Highly Asymmetric Hysteresis — Junho Song and Armen Der Kiureghian; 132 (6), 610-8 (2006).
Song, Seong Hyeok
Application of Graded Finite Elements for Asphalt Pavements — William G. Buttlar, Glaucio H. Paulino, and Seong Hyeok Song; 132 (3), 240-9 (2006).
Simulation of Crack Propagation in Asphalt Concrete Using an Intrinsic Cohesive Zone Model — Seong Hyeok Song, Glaucio H. Paulino, and William G. Buttlar; 132 (11), 1215-23 (2006).
Spencer, B. F., Jr.
Experimental Verification of Smart Cable Damping — Richard E. Christenson, B. F. Spencer Jr., and Erik A. Johnson; 132 (3), 268-78 (2006).
Spinelli, Davide
Ground Motion Induced by Train Passage — Roberto Paolucci and Davide Spinelli; 132 (2), 201-10 (2006).
Srinivas, Y.
Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (3), 327-35 (2006).
Erratum for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (6), 704 (2006).
Errata for "Large-Eddy Simulation of High Reynolds Number Turbulent Flow Past a Square Cylinder" by Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan — Y. Srinivas, G. Biswas, A. S. Parihar, and R. Ranjan; 132 (7), 793 (2006).
Sture, Stein
Damage Theory Based on Composite Mechanics — Yunping Xi, Morteza Eskandari-Ghadi, Suwito, and Stein Sture; 132 (11), 1195-204 (2006).
Subramaniam, Kolluru
Experimental Investigation and Fracture Analysis of Debonding between Concrete and FRP Sheets — Mohamad Ali-Ahmad, Kolluru Subramaniam, and Michel Ghosn; 132 (9), 914-23 (2006).
Sun, Lu
Stochastic Spatial Excitation Induced by a Distributed Contact on Homogenous Gaussian Random Fields — Lu Sun, William Kenis, and Weijun Wang; 132 (7), 714-22 (2006).
Sundararajan, N.
Influence of Functionally Graded Material on Buckling of Skew Plates under Mechanical Loads — M. Ganapathi, T. Prakash, and N. Sundararajan; 132 (8), 902-5 (2006).
Sung Kim, Eui
Theoretical Analysis of Transfer Lengths in Pretensioned Prestressed Concrete Members — Byung Hwan Oh, Eui Sung Kim, and Young Cheol Choi; 132 (10), 1057-66 (2006).
Suwito
Damage Theory Based on Composite Mechanics — Yunping Xi, Morteza Eskandari-Ghadi, Suwito, and Stein Sture; 132 (11), 1195-204 (2006).
Takewaki, Izuru
Probabilistic Critical Excitation Method for Earthquake Energy Input Rate — Izuru Takewaki; 132 (9), 990-1000 (2006).
Tan, V. B. C.
Buckling of Multiwalled Carbon Nanotubes Using Timoshenko Beam Theory — Y. Y. Zhang, C. M. Wang, and V. B. C. Tan; 132 (9), 952-8 (2006).
Terro, M.
Control of Suspension Bridge Nonlinear Vibrations due to Moving Loads — Naif B. Almutairi, M. F. Hassan, M. Abdel-Rohman, and M. Terro; 132 (6), 659-70 (2006).
Thakkar, Bhairav K.
Damage-Coupled Progressive Failure and Yield Line Analyses of Metal Plates — Bhairav K. Thakkar and P. C. Pandey; 132 (5), 487-97 (2006).
Tobita, Tetsuo
Rotation Response of a Rigid Body under Seismic Excitation — Tetsuo Tobita and Sumio Sawada; 132 (4), 375-84 (2006).
Tsai, C. C.
Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong;

132 (3), 317-26 (2006).

Tufekci, E.

Exact Solution of Out-of-Plane Problems of an Arch with Varying Curvature and Cross Section — E. Tufekci and O. Y. Dogruer; 132 (6), 600-9 (2006).

Tung, W. K.

Determination of Nonlinear Softening Behavior at FRP Composite/Concrete Interface — Christopher K. Y. Leung, Marcus Klenke, W. K. Tung, and Herman C. Y. Luk; 132 (5), 498-508 (2006).

Three-Parameter Model for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and W. K. Tung; 132 (5), 509-18 (2006).

Udwadia, Firdaus E.

Time-Delayed Positive Velocity Feedback Control Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Val, Dimitri V.

Energy Evaluation for Ramberg–Osgood Hysteretic Model — Fred Segal and Dimitri V. Val; 132 (9), 907-13 (2006).

Valiente, A.

Symmetric Catenary of a Uniform Elastic Cable of Neo-Hookean Material — A. Valiente; 132 (7), 747-53 (2006).

Vecchio, F. J.

Closed-Form Stiffness Matrix for the Four-Node Quadrilateral Element with a Fully Populated Material Stiffness — C. E. Zhou and F. J. Vecchio; 132 (12), 1392-5 (2006).

Vidal, P.

Influence of Hopper Eccentricity on Discharge of Cylindrical Mass Flow Silos with Rigid Walls — P. Vidal, A. Couto, F. Ayuga, and M. Guaita; 132 (9), 1026-33 (2006).

Virgin, Lawrence N.

Postbuckling of Elastic Columns with Second-Mode Imperfection — Raymond H. Plaut, David A. Dillard, and Lawrence N. Virgin; 132 (8), 898-901 (2006).

von Bremen, Hubertus F.

Time-Delayed Positive Velocity Feedback Control Design for Active Control of Structures — Phailaung Phohomsiri, Firdaus E. Udwadia, and Hubertus F. von Bremen; 132 (6), 690-703 (2006).

Walters, Matthew C.

Computation of Mixed-Mode Stress Intensity Factors for Cracks in Three-Dimensional Functionally Graded Solids — Matthew C. Walters, Glaucio H. Paulino, and Robert H. Dodds Jr.; 132 (1), 1-15 (2006).

Wang, C. M.

Postbuckling of Beam Subjected to Intermediate Follower Force — B. Phungpaingam, S. Chucheepsakul, and C. M. Wang; 132 (1), 16-25 (2006).

Buckling of Multiwalled Carbon Nanotubes Using Timoshenko Beam Theory — Y. Y. Zhang, C. M. Wang, and V. B. C. Tan; 132 (9), 952-8 (2006).

Wang, Cheng-Bo

Axisymmetric Nonlinear Stability of a Shallow Conical Shell with a Spherical Cap of Arbitrary Variable Shell Thickness — Chao-Sheng Hou, Yue Yin, and Cheng-Bo Wang; 132 (10), 1146-9 (2006).

Wang, Jialai

Fracture Analysis of Shear Deformable Bi-Material Interface — Jialai Wang and Pizhong Qiao; 132 (3), 306-16 (2006).

Wang, Shuqing

Cross-Modal Strain Energy Method for Estimating Damage Severity — Sau-Lon James Hu, Shuqing Wang, and Huajun Li; 132 (4), 429-37 (2006).

Wang, Weijun

Stochastic Spatial Excitation Induced by a Distributed Contact on Homogenous Gaussian Random Fields — Lu Sun, William Kenis, and Weijun Wang; 132 (7), 714-22 (2006).

Wang, Xingzhe

Dynamic Stability of Ferromagnetic Beam-Plates with Magnetoelastic Interaction and Magnetic Damping in Transverse Magnetic Fields — Xingzhe Wang and Jong Seh Lee; 132 (4), 422-8 (2006).

Willam, Kaspar

— Kaspar Willam; 132 (12), 1400 (2006).

Williams, Todd O.

A Stochastic Transformation Field Theory for Heterogeneous Materials — Todd O. Williams; 132 (11), 1224-40 (2006).

Wiraguna, S. I.

Hyperelasticity Model for Finite Element Analysis of Natural and High Damping Rubbers in Compression and Shear — A. F. M. S. Amin, S. I. Wiraguna, A. R. Bhuiyan, and Y. Okui; 132 (1), 54-64 (2006).

Wong, Kevin K. F.

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Wong, T. K.

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Wu, Chin H.

Fully Nonhydrostatic Modeling of Surface Waves — Hengliang Yuan and Chin H. Wu; 132 (4), 447-56 (2006).

Spatial and Temporal Characteristics of Transient Extreme Wave Profiles on Depth-Varying Currents — Aifeng Yao and Chin H. Wu; 132 (9), 1015-25 (2006).

Wu, David

Hysteresis of Matric Suction and Capillary Stress in Monodisperse Disk-Shaped Particles — Jeremy Lechman, Ning Lu, and David Wu; 132 (5), 565-77 (2006).

Xi, Yunping

Damage Theory Based on Composite Mechanics — Yunping Xi, Morteza Eskandari-Ghadi, Suwito, and Stein Sture; 132 (11), 1195-204 (2006).

Xia, Kaiming

New Stabilized Finite Element Method Embedded with a Cap Model for the Analysis of Granular Materials — Kaiming Xia and Arif Masud; 132 (3), 250-9 (2006).

Xia, Yong

Auto-Parametric Vibration of a Cable-Stayed-Beam Structure under Random Excitation — Yong Xia and Yozo Fujino; 132 (3), 279-86 (2006).

Xiang, Y.

Vibration of Open Cylindrical Shells with Stepped Thickness Variations — L. Zhang and Y. Xiang; 132 (7), 780-4 (2006).

Xu, Y. L.

Safety Analysis of Moving Road Vehicles on a Long Bridge under Crosswind — W. H. Guo and Y. L. Xu; 132 (4), 438-46 (2006).

Yang, Hezhen

Modal Strain Energy Decomposition Method for Damage Localization in 3D Frame Structures — Huajun Li, Hezhen Yang, and S.-L. James Hu; 132 (9), 941-51 (2006).

Yang, Songtao

Unified Sand Model Based on the Critical State and Generalized Plasticity — Hoe I. Ling and Songtao Yang; 132 (12), 1380-91 (2006).

Yang, Yong

Energy-Based Modeling Approach for Debonding of FRP Plate from Concrete Substrate — Christopher K. Y. Leung and Yong Yang; 132 (6), 583-93 (2006).

Yao, Aifeng

Spatial and Temporal Characteristics of Transient Extreme Wave Profiles on Depth-Varying Currents — Aifeng Yao and Chin H. Wu; 132 (9), 1015-25 (2006).

Yao, Wenjuan

Internal Forces for Statically Indeterminate Structures Having Different Moduli in Tension and Compression — Wenjuan Yao and Zhiming Ye; 132 (7), 739-46 (2006).

Ye, Jianqiao

Book Reviews — Jianqiao Ye; 132 (9), 1034-5 (2006).

Ye, Zhiming

Internal Forces for Statically Indeterminate Structures Having Different Moduli in Tension and Compression — Wenjuan Yao and Zhiming Ye; 132 (7), 739-46 (2006).

Yim, Solomon C. S.

Coupled Surge-Heave Motions of a Moored System. I: Model Calibration and Parametric Study — Huan Lin and Solomon C. S. Yim; 132 (6), 671-80 (2006).

Coupled Surge-Heave Motions of a Moored System. II: Stochastic Analysis and Simulations — Solomon C. S. Yim and Huan Lin; 132 (6), 681-9 (2006).

Yin, Yue

Axisymmetric Nonlinear Stability of a Shallow Conical Shell with a Spherical Cap of Arbitrary Variable Shell Thickness — Chao-Sheng Hou, Yue Yin, and Cheng-Bo Wang; 132 (10), 1146-9 (2006).

Yoo, Pyeong Jun

Viscoelastic Modeling and Field Validation of Flexible Pavements — Mostafa A. Elseifi, Imad L. Al-Qadi, and Pyeong Jun Yoo; 132 (2), 172-8 (2006).

Young, D. L.

Numerical Simulation of Solitary Waves Using Velocity–Vorticity Formulation of Navier–Stokes Equations — D. C. Lo and D. L. Young; 132 (2), 211-9 (2006).

Method of Fundamental Solutions for Three-Dimensional Stokes Flow in Exterior Field — C. C. Tsai, D. L. Young, D. C. Lo, and T. K. Wong; 132 (3), 317-26 (2006).

Yu, Qiang

Size Effect on Strength of Quasibrittle Structures with Reentrant Corners Symmetrically Loaded in Tension — Zdeněk P. Bažant and Qiang Yu;

132 (11), 1168-76 (2006).

Yuan, Hengliang

Fully Nonhydrostatic Modeling of Surface Waves — Hengliang Yuan and Chin H. Wu; 132 (4), 447-56 (2006).

Zbib, Hussein

Finite-Element Analysis of Hot Mix Asphalt Microstructure Using Effective Local Material Properties and Strain Gradient Elasticity — Samer Dessouky, Eyad Masad, Dallas Little, and Hussein Zbib; 132 (2), 158-71 (2006).

Zhang, L.

Vibration of Open Cylindrical Shells with Stepped Thickness Variations — L. Zhang and Y. Xiang; 132 (7), 780-4 (2006).

Zhang, Q.

Porothermoelastic Analysis of the Response of a Stationary Crack Using the Displacement Discontinuity Method — A. Ghassemi and Q. Zhang; 132 (1), 26-33 (2006).

Zhang, Xiao Ming

Dynamic Response of Closed-Loop System with Uncertain Parameters Using Interval Finite-Element Method — Su Huan Chen and Xiao Ming Zhang; 132 (8), 830-40 (2006).

Zhang, Y. Y.

Buckling of Multiwalled Carbon Nanotubes Using Timoshenko Beam Theory — Y. Y. Zhang, C. M. Wang, and V. B. C. Tan; 132 (9), 952-8 (2006).

Zhao, Dianfeng

New Approach for Seismic Nonlinear Analysis of Inelastic Framed Structures — Dianfeng Zhao and Kevin K. F. Wong; 132 (9), 959-66 (2006).

Zhao, J.

Normal Transmission of S-Wave Across Parallel Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).

Zhao, X. B.

Normal Transmission of S-Wave Across Parallel Fractures with Coulomb Slip Behavior — X. B. Zhao, J. Zhao, A. M. Hefny, and J. G. Cai; 132 (6), 641-50 (2006).

Zhong, Hongzhi

Buckling of Simply Supported Rectangular Reissner–Mindlin Plates Subjected to Linearly Varying In-Plane Loading — Hongzhi Zhong and Chao Gu; 132 (5), 578-81 (2006).

Zhou, C. E.

Closed-Form Stiffness Matrix for the Four-Node Quadrilateral Element with a Fully Populated Material Stiffness — C. E. Zhou and F. J. Vecchio; 132 (12), 1392-5 (2006).

Zhou, Xiangming

Upsetting Tests of Fresh Cementitious Composites for Extrusion — Xiangming Zhou and Zongjin Li; 132 (2), 149-57 (2006).

Zhu, X. Q.

Vehicle Condition Surveillance on Continuous Bridges Based on Response Sensitivity — S. S. Law, J. Q. Bu, X. Q. Zhu, and S. L. Chan; 132 (1), 78-86 (2006).

Innovative Bridge Condition Assessment from Dynamic Response of a Passing Vehicle — J. Q. Bu, S. S. Law, and X. Q. Zhu; 132 (12), 1372-9 (2006).

Zhu, Xueye

Three-Degree-of-Freedom Rigid Model for Seismic Analysis of Cracked Concrete Gravity Dams — O. A. Pekau and Xueye Zhu; 132 (9), 979-89 (2006).
